

# Anti-ANGPTL4 Antibody

Catalog # ABO10755

## Product Information

---

|                          |                                                                                                                          |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Application</b>       | WB                                                                                                                       |
| <b>Primary Accession</b> | <a href="#">Q9BY76</a>                                                                                                   |
| <b>Host</b>              | Rabbit                                                                                                                   |
| <b>Reactivity</b>        | Human                                                                                                                    |
| <b>Clonality</b>         | Polyclonal                                                                                                               |
| <b>Format</b>            | Lyophilized                                                                                                              |
| <b>Description</b>       | Rabbit IgG polyclonal antibody for Angiopoietin-related protein 4(ANGPTL4) detection. Tested with WB in Human;Mouse;Rat. |
| <b>Reconstitution</b>    | Add 0.2ml of distilled water will yield a concentration of 500ug/ml.                                                     |
| <b>Predicted</b>         | Rat                                                                                                                      |

## Additional Information

|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene ID</b>                  | 51129                                                                                                                                                                                                                                               |
| <b>Other Names</b>              | Angiopoietin-related protein 4, Angiopoietin-like protein 4, Hepatic fibrinogen/angiopoietin-related protein, HFARP, ANGPTL4, ARP4, HFARP, PGAR                                                                                                     |
| <b>Calculated MW</b>            | 45214                                                                                                                                                                                                                                               |
| <b>Application Details</b>      | Western blot, 0.1-0.5 µg/ml, Human, Mouse, Rat                                                                                                                                                                                                      |
| <b>Subcellular Localization</b> | Secreted . Secreted, extracellular space, extracellular matrix . The unprocessed form interacts with the extracellular matrix. This may constitute a dynamic reservoir, a regulatory mechanism of the bioavailability of ANGPTL4 (By similarity). . |
| <b>Tissue Specificity</b>       | Expressed at high levels in the placenta, heart, liver, muscle, pancreas and lung but expressed poorly in the brain and kidney. .                                                                                                                   |
| <b>Source</b>                   | Eukaryota                                                                                                                                                                                                                                           |
| <b>Protein Name</b>             | Angiopoietin-related protein 4                                                                                                                                                                                                                      |
| <b>Contents</b>                 | Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na <sub>2</sub> HPO <sub>4</sub> , 0.05mg Thimerosal, 0.05mg Na <sub>3</sub> .                                                                                                                        |
| <b>Immunogen</b>                | A synthetic peptide corresponding to a sequence at the C-terminus of human Angiopoietin-like 4(349-367aa WWFGTCSHSNLNGQYFRSI), different from the related rat and mouse sequences by one amino acid.                                                |

|                              |                                                                                                                                                                                       |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Purification</b>          | Immunogen affinity purified.                                                                                                                                                          |
| <b>Cross Reactivity</b>      | No cross reactivity with other proteins                                                                                                                                               |
| <b>Storage</b>               | At -20 °C for one year. After r ° Constitution, at 4 °C for one month. It ° Can also be aliquotted and stored frozen at -20 °C for a longer time.Avoid repeated freezing and thawing. |
| <b>Sequence Similarities</b> | Contains 1 fibrinogen C-terminal domain.                                                                                                                                              |

## Protein Information

| <b>Name</b>              | ANGPTL4                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Synonyms</b>          | ARP4, HFARP, PGAR {ECO:0000303 PubMed:10                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Function</b>          | Mediates inactivation of the lipoprotein lipase LPL, and thereby plays a role in the regulation of triglyceride clearance from the blood serum and in lipid metabolism (PubMed: <a href="#">19270337</a> , PubMed: <a href="#">21398697</a> , PubMed: <a href="#">27929370</a> , PubMed: <a href="#">29899144</a> ). May also play a role in regulating glucose homeostasis and insulin sensitivity (Probable). Inhibits proliferation, migration, and tubule formation of endothelial cells and reduces vascular leakage (PubMed: <a href="#">14583458</a> , PubMed: <a href="#">17068295</a> ). Upon heterologous expression, inhibits the adhesion of endothelial cell to the extracellular matrix (ECM), and inhibits the reorganization of the actin cytoskeleton, formation of actin stress fibers and focal adhesions in endothelial cells that have adhered to ANGPTL4-containing ECM (in vitro) (PubMed: <a href="#">17068295</a> ). Depending on context, may modulate tumor-related angiogenesis (By similarity). |
| <b>Cellular Location</b> | Secreted. Secreted, extracellular space, extracellular matrix. Note=The unprocessed form interacts with the extracellular matrix (PubMed:17068295, PubMed:21398697). This may constitute a dynamic reservoir, a regulatory mechanism of the bioavailability of ANGPTL4 (Probable).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Tissue Location</b>   | Detected in blood plasma (at protein level) (PubMed:29899519). Detected in liver (PubMed:10698685). Detected in white fat tissue and placenta (PubMed:10866690). Expressed at high levels in the placenta, heart, liver, muscle, pancreas and lung but expressed poorly in the brain and kidney.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Background

---

Angiopoietin-related protein 4(Angptl4) is a protein that in humans is encoded by the ANGPTL4 gene. This gene is a member of the angiopoietin/angiopoietin-like gene family and encodes a glycosylated, secreted protein with a fibrinogen C-terminal domain. This gene is induced under hypoxic conditions in endothelial cells and is the target of peroxisome proliferation activators. By radiation hybrid analysis, Angptl4 gene is mapped to 19p13.3. ANGPTL4 contributed to tumor growth and protected cells from anoikis, a form of programmed cell death induced when contact-dependent cells detach from the surrounding tissue matrix.
