

# Anti-CASR Picoband Antibody

Catalog # ABO12609

## Product Information

---

|                          |                                                                                                                                      |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application</b>       | WB, IHC-P                                                                                                                            |
| <b>Primary Accession</b> | <a href="#">P41180</a>                                                                                                               |
| <b>Host</b>              | Rabbit                                                                                                                               |
| <b>Reactivity</b>        | Human, Mouse, Rat                                                                                                                    |
| <b>Clonality</b>         | Polyclonal                                                                                                                           |
| <b>Format</b>            | Lyophilized                                                                                                                          |
| <b>Description</b>       | Rabbit IgG polyclonal antibody for Extracellular calcium-sensing receptor(CASR) detection. Tested with WB, IHC-P in Human;Mouse;Rat. |
| <b>Reconstitution</b>    | Add 0.2ml of distilled water will yield a concentration of 500ug/ml.                                                                 |

## Additional Information

---

|                                 |                                                                                                                                                                                   |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene ID</b>                  | 846                                                                                                                                                                               |
| <b>Other Names</b>              | Extracellular calcium-sensing receptor, CaSR, Parathyroid cell calcium-sensing receptor 1, PCaR1, CASR, GPRC2A, PCAR1                                                             |
| <b>Calculated MW</b>            | 120675                                                                                                                                                                            |
| <b>Application Details</b>      | Immunohistochemistry(Paraffin-embedded Section), 0.5-1 $\mu$ g/ml, Mouse, Rat, Human, By Heat<br><br>Western blot, 0.1-0.5 $\mu$ g/ml, Human, Mouse, Rat                          |
| <b>Subcellular Localization</b> | Cell membrane ; Multi-pass membrane protein .                                                                                                                                     |
| <b>Tissue Specificity</b>       | Expressed in the temporal lobe, frontal lobe, parietal lobe, hippocampus, and cerebellum. Also found in kidney, lung, liver, heart, skeletal muscle, placenta. .                  |
| <b>Source</b>                   | Eukaryota                                                                                                                                                                         |
| <b>Protein Name</b>             | Extracellular calcium-sensing receptor                                                                                                                                            |
| <b>Contents</b>                 | Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na <sub>2</sub> HPO <sub>4</sub> , 0.05mg NaN <sub>3</sub> .                                                                        |
| <b>Immunogen</b>                | E. coli-derived human CASR recombinant protein (Position: Q926-S1078). Human CASR shares 80.5% and 78.6% amino acid (aa) sequence identity with mouse and rat CASR, respectively. |
| <b>Purification</b>             | Immunogen affinity purified.                                                                                                                                                      |

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Cross Reactivity</b> | No cross reactivity with other proteins                                                                                                                                               |
| <b>Storage</b>          | At -20 °C for one year. After r ° Constitution, at 4 °C for one month. It ° Can also be aliquotted and stored frozen at -20 °C for a longer time.Avoid repeated freezing and thawing. |

## Protein Information

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b>Name</b>              | CASR {ECO:0000303 PubMed:16740594, ECO:0000312 HGNC:HGNC:1514}                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Function</b>          | <p>G protein-coupled receptor that senses changes in the extracellular concentration of calcium ions and plays a key role in maintaining calcium homeostasis (PubMed:<a href="#">17555508</a>, PubMed:<a href="#">19789209</a>, PubMed:<a href="#">21566075</a>, PubMed:<a href="#">22114145</a>, PubMed:<a href="#">22789683</a>, PubMed:<a href="#">23966241</a>, PubMed:<a href="#">25104082</a>, PubMed:<a href="#">25292184</a>, PubMed:<a href="#">25766501</a>, PubMed:<a href="#">26386835</a>, PubMed:<a href="#">32817431</a>, PubMed:<a href="#">33603117</a>, PubMed:<a href="#">34194040</a>, PubMed:<a href="#">34467854</a>, PubMed:<a href="#">7759551</a>, PubMed:<a href="#">8636323</a>, PubMed:<a href="#">8702647</a>, PubMed:<a href="#">8878438</a>). Senses fluctuations in the circulating calcium concentration: activated by elevated circulating calcium, leading to decreased parathyroid hormone (PTH) secretion in parathyroid glands (By similarity). In kidneys, acts as a key regulator of renal tubular calcium resorption (By similarity). Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of downstream effectors (PubMed:<a href="#">38632411</a>). CASR is coupled with different G(q)/G(11), G(i)/G(o)- or G(s)-classes of G proteins depending on the context (PubMed:<a href="#">38632411</a>). In the parathyroid and kidney, CASR signals through G(q)/G(11) and G(i)/G(o) G proteins: G(q)/G(11) coupling activates phospholipase C-beta, releasing diacylglycerol (DAG) and inositol 1,4,5-trisphosphate (IP3) second messengers, while G(i)/G(o) coupling mediates inhibition of adenylate cyclase activity (PubMed:<a href="#">38632411</a>, PubMed:<a href="#">7759551</a>). The G protein- coupled receptor activity is activated by a co-agonist mechanism: aromatic amino acids, such as Trp or Phe, act concertedly with divalent cations, such as calcium or magnesium, to achieve full receptor activation (PubMed:<a href="#">27386547</a>, PubMed:<a href="#">27434672</a>, PubMed:<a href="#">32817431</a>, PubMed:<a href="#">33603117</a>, PubMed:<a href="#">34194040</a>). Acts as an activator of the NLRP3 inflammasome via G(i)/G(o)-mediated signaling: down-regulation of cyclic AMP (cAMP) relieving NLRP3 inhibition by cAMP (PubMed:<a href="#">32843625</a>). Acts as a regulator of proton-sensing receptor GPR68 in a seesaw manner: CASR-mediated signaling inhibits GPR68 signaling in response to extracellular calcium, while GPR68 inhibits CASR in presence of extracellular protons (By similarity).</p> |
| <b>Cellular Location</b> | Cell membrane; Multi-pass membrane protein                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Tissue Location</b>   | Expressed in the temporal lobe, frontal lobe, parietal lobe, hippocampus, and cerebellum. Also found in kidney, lung, liver, heart, skeletal muscle, placenta.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Background

The calcium-sensing receptor (CaSR) is a G protein-coupled receptor that is expressed in the parathyroid hormone (PTH)-producing chief cells of the parathyroid gland, and the cells lining the kidney tubule. It senses small changes in circulating calcium concentration and couples this information to intracellular signaling pathways that modify PTH secretion or renal cation handling, thus this protein plays an essential role in maintaining mineral ion homeostasis. Mutations in this gene cause familial hypocalciuric hypercalcemia, familial, isolated hypoparathyroidism, and neonatal severe primary hyperparathyroidism.

## Images

Western blot analysis of CASR expression in HELA whole cell lysates (lane 1) and 22RV1 whole cell lysates (lane 2). CASR at 150KD was detected using rabbit anti- CASR Antigen Affinity purified polyclonal antibody (Catalog # ABO12609) at 0.5  $\mu$ g/mL. The blot was developed using chemiluminescence (ECL) method .

CASR was detected in paraffin-embedded sections of mouse kidney tissues using rabbit anti- CASR Antigen Affinity purified polyclonal antibody (Catalog # ABO12609) at 1  $\mu$ g/mL. The immunohistochemical section was developed using SABC method .

CASR was detected in paraffin-embedded sections of rat kidney tissues using rabbit anti- CASR Antigen Affinity purified polyclonal antibody (Catalog # ABO12609) at 1  $\mu$ g/mL. The immunohistochemical section was developed using SABC method .
