

# Anti-PRMT5 Rabbit Monoclonal Antibody

Catalog # ABO13639

## Product Information

---

|                          |                                                                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application</b>       | WB, IHC, IF, ICC, FC                                                                                                                         |
| <b>Primary Accession</b> | <a href="#">O14744</a>                                                                                                                       |
| <b>Host</b>              | Rabbit                                                                                                                                       |
| <b>Isotype</b>           | Rabbit IgG                                                                                                                                   |
| <b>Reactivity</b>        | Rat, Human, Mouse                                                                                                                            |
| <b>Clonality</b>         | Monoclonal                                                                                                                                   |
| <b>Format</b>            | Liquid                                                                                                                                       |
| <b>Description</b>       | Anti-PRMT5 Rabbit Monoclonal Antibody . Tested in WB, IHC, ICC/IF, Flow Cytometry applications. This antibody reacts with Human, Mouse, Rat. |

## Additional Information

| <b>Application Details</b>      | WB 1:5000-1:10000<br>IHC 1:50-1:200<br>ICC/IF 1:50-1:200<br>FC 1:50                                                                                                                                                                                                                                                      |
| <b>Subcellular Localization</b> | Cytoplasm. Nucleus. Golgi apparatus.                                                                                                                                                                                                                                                                                     |
| <b>Tissue Specificity</b>       | Ubiquitous..                                                                                                                                                                                                                                                                                                             |
| <b>Source</b>                   | Eukaryota                                                                                                                                                                                                                                                                                                                |
| <b>Contents</b>                 | Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.                                                                                                                                                                                                      |
| <b>Clone Names</b>              | Clone: DCE-16                                                                                                                                                                                                                                                                                                            |
| <b>Immunogen</b>                | A synthesized peptide derived from human PRMT5                                                                                                                                                                                                                                                                           |
| <b>Purification</b>             | Affinity-chromatography                                                                                                                                                                                                                                                                                                  |
| <b>Storage</b>                  | Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.                                                                                                                                                                               |

| <b>Function</b>          | <p>Arginine methyltransferase that can both catalyze the formation of omega-N monomethylarginine (MMA) and symmetrical dimethylarginine (sDMA), with a preference for the formation of MMA (PubMed:<a href="#">10531356</a>, PubMed:<a href="#">11152681</a>, PubMed:<a href="#">11747828</a>, PubMed:<a href="#">12411503</a>, PubMed:<a href="#">15737618</a>, PubMed:<a href="#">17709427</a>, PubMed:<a href="#">20159986</a>, PubMed:<a href="#">20810653</a>, PubMed:<a href="#">21081503</a>, PubMed:<a href="#">21258366</a>, PubMed:<a href="#">21917714</a>, PubMed:<a href="#">22269951</a>). Specifically mediates the symmetrical dimethylation of arginine residues in the small nuclear ribonucleoproteins Sm D1 (SNRPD1) and Sm D3 (SNRPD3); such methylation being required for the assembly and biogenesis of snRNP core particles (PubMed:<a href="#">11747828</a>, PubMed:<a href="#">12411503</a>, PubMed:<a href="#">17709427</a>). Methylates SUPT5H and may regulate its transcriptional elongation properties (PubMed:<a href="#">12718890</a>). May methylate the N-terminal region of MBD2 (PubMed:<a href="#">16428440</a>). Mono- and dimethylates arginine residues of myelin basic protein (MBP) in vitro. May play a role in cytokine-activated transduction pathways. Negatively regulates cyclin E1 promoter activity and cellular proliferation. Methylates histone H2A and H4 'Arg-3' during germ cell development (By similarity). Methylates histone H3 'Arg-8', which may repress transcription (By similarity). Methylates the Piwi proteins (PIWIL1, PIWIL2 and PIWIL4), methylation of Piwi proteins being required for the interaction with Tudor domain-containing proteins and subsequent localization to the meiotic nuage (By similarity). Methylates RPS10. Attenuates EGF signaling through the MAPK1/MAPK3 pathway acting at 2 levels. First, monomethylates EGFR; this enhances EGFR 'Tyr-1197' phosphorylation and PTPN6 recruitment, eventually leading to reduced SOS1 phosphorylation (PubMed:<a href="#">21258366</a>, PubMed:<a href="#">21917714</a>). Second, methylates RAF1 and probably BRAF, hence destabilizing these 2 signaling proteins and reducing their catalytic activity (PubMed:<a href="#">21917714</a>). Required for induction of E-selectin and VCAM-1, on the endothelial cells surface at sites of inflammation. Methylates HOXA9 (PubMed:<a href="#">22269951</a>). Methylates and regulates SRGAP2 which is involved in cell migration and differentiation (PubMed:<a href="#">20810653</a>). Acts as a transcriptional corepressor in CRY1-mediated repression of the core circadian component PER1 by regulating the H4R3 dimethylation at the PER1 promoter (By similarity). Methylates GM130/GOLGA2, regulating Golgi ribbon formation (PubMed:<a href="#">20421892</a>). Methylates H4R3 in genes involved in glioblastomagenesis in a CHTOP- and/or TET1-dependent manner (PubMed:<a href="#">25284789</a>). Symmetrically methylates POLR2A, a modification that allows the recruitment to POLR2A of proteins including SMN1/SMN2 and SETX. This is required for resolving RNA-DNA hybrids created by RNA polymerase II, that form R-loop in transcription terminal regions, an important step in proper transcription termination (PubMed:<a href="#">26700805</a>). Along with LYAR, binds the promoter of gamma-globin HBG1/HBG2 and represses its expression (PubMed:<a href="#">25092918</a>). Symmetrically methylates NCL (PubMed:<a href="#">21081503</a>). Methylates p53/TP53; methylation might possibly affect p53/TP53 target gene specificity (PubMed:<a href="#">19011621</a>). Involved in spliceosome maturation and mRNA splicing in prophase I spermatocytes through the catalysis of the symmetrical arginine dimethylation of SNRPB (small nuclear ribonucleoprotein- associated protein) and the interaction with tudor domain-containing protein TDRD6 (By similarity).</p> |
| <b>Cellular Location</b> | Cytoplasm. Nucleus. Chromosome. Golgi apparatus. Note=Localizes to promoter regions of target genes on chromosomes (PubMed: <a href="#">33376131</a> ). Localizes to methylated chromatin (PubMed: <a href="#">16428440</a> ).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
