

# Anti-Phospho-Histone H3 (S28) Rabbit Monoclonal Antibody

Catalog # ABO16738

## Product Information

---

|                          |                                                                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application</b>       | WB, IHC                                                                                                                                         |
| <b>Primary Accession</b> | <a href="#">P68431</a>                                                                                                                          |
| <b>Host</b>              | Rabbit                                                                                                                                          |
| <b>Isotype</b>           | Rabbit IgG                                                                                                                                      |
| <b>Reactivity</b>        | Rat, Human, Mouse                                                                                                                               |
| <b>Clonality</b>         | Monoclonal                                                                                                                                      |
| <b>Format</b>            | Liquid                                                                                                                                          |
| <b>Description</b>       | Anti-Phospho-Histone H3 (S28) Rabbit Monoclonal Antibody . Tested in WB, IHC, ICC/IF applications. This antibody reacts with Human, Mouse, Rat. |

## Additional Information

| <b>Contents</b>            | Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.                                                                                          |
| <b>Clone Names</b>         | Clone: 32H09                                                                                                                                                                                                 |
| <b>Immunogen</b>           | A synthesized peptide derived from human Phospho-Histone H3 (S28)                                                                                                                                            |
| <b>Purification</b>        | Affinity-chromatography                                                                                                                                                                                      |
| <b>Storage</b>             | Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.                                                                   |

## Protein Information

---

|             |                                    |
|-------------|------------------------------------|
| <b>Name</b> | H3C1 ( <a href="#">HGNC:4766</a> ) |
|-------------|------------------------------------|

**Synonyms**

H3FA, HIST1H3A

**Function**

Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling.

**Cellular Location**

Nucleus. Chromosome.

**Images**

---

All lanes use the Antibody at 1:2K dilution for 1 hour at room temperature.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
