CK19

Rabbit Monoclonal antibody(Mab)
Catalog # AD80023

Product Information

Application	IHC-P
Primary Accession	P08727
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal
Clone Names	191B6A6
Calculated MW	44106

Additional Information

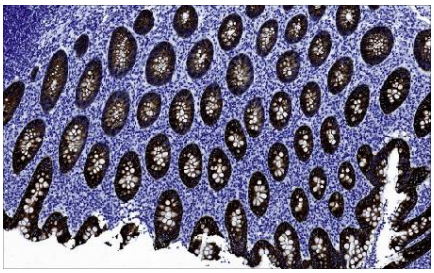

Gene ID	3880
Gene Name	KRT19
Other Names	Keratin, type I cytoskeletal 19, Cytokeratin-19, CK-19, Keratin-19, K19, KRT19
Dilution	IHC-P~~Ready-to-use
Storage	Maintain refrigerated at 2-8°C.
Precautions	CK19 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

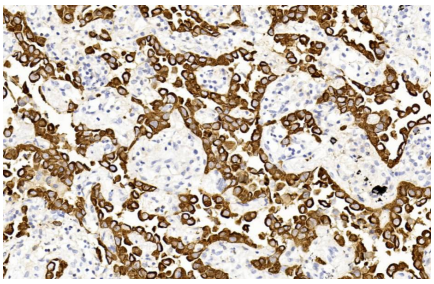

Name	KRT19 (HGNC:6436)
Function	Structural component of intermediate filaments in epithelial cells. Forms intermediate filaments by heterodimerizing with the type II keratin KRT8, providing mechanical integrity to epithelial cells (PubMed:16000376). Integrates into the intermediate filament network of skeletal muscle fibers alongside desmin and KRT18, contributing to force transmission (By similarity). Specifically interacts with the actin-binding domain of dystrophin, helping to link the contractile apparatus to dystrophin at the costameres of striated muscle (PubMed:16000376).
Tissue Location	Expressed in a defined zone of basal keratinocytes in the deep outer root sheath of hair follicles. Also observed in sweat gland and mammary gland ductal and secretory cells, bile ducts, gastrointestinal tract, bladder urothelium, oral epithelia, esophagus, ectocervical epithelium (at protein level). Expressed in epidermal basal cells, in nipple epidermis and a defined region of the hair follicle. Also seen in a subset of vascular wall cells in both the veins and artery of human umbilical cord, and in umbilical cord vascular smooth muscle. Observed in muscle fibers accumulating in the costameres of myoplasm at the sarcolemma in structures that contain dystrophin and

spectrin.

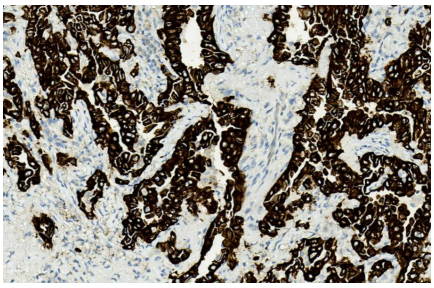

Images

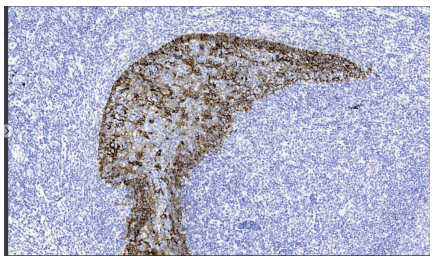

Immunohistochemical analysis of formalin-fixed and paraffin-embedded human appendix tissue was performed with CK19 primary antibody, followed by peroxidase-conjugated secondary antibody and DAB staining.

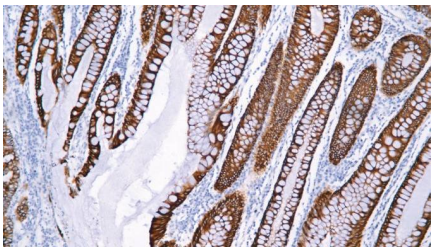

Immunohistochemical analysis of formalin-fixed and paraffin-embedded human lung adenocarcinoma tissue was performed with CK19 primary antibody, followed by peroxidase-conjugated secondary antibody and DAB staining.

Immunohistochemical analysis of formalin-fixed and paraffin-embedded human lung adenocarcinoma tissue was performed with CK19 primary antibody, followed by peroxidase-conjugated secondary antibody and DAB staining.

Immunohistochemical analysis of formalin-fixed and paraffin-embedded human tonsil tissue was performed with CK19 primary antibody, followed by peroxidase-conjugated secondary antibody and DAB staining.

Immunohistochemical analysis of formalin-fixed and paraffin-embedded human colon carcinoma tissue was performed with CK19 primary antibody, followed by peroxidase-conjugated secondary antibody and DAB staining.
