

# Vimentin

Mouse Monoclonal antibody(Mab)

Catalog # AD80040

## Product Information

---

Application	IHC-P
Primary Accession	<a href="#">P08670</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Clone Names	312D6H4
Calculated MW	53652

## Additional Information

---

Gene ID	7431
Gene Name	VIM
Other Names	Vimentin, VIM
Dilution	IHC-P~~Ready-to-use
Storage	Maintain refrigerated at 2-8°C.
Precautions	Vimentin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

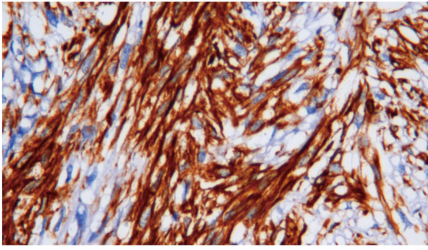

## Protein Information

---

Name	VIM ( <a href="#">HGNC:12692</a> )
Function	Vimentins are class-III intermediate filaments found in various non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally. Plays a role in cell directional movement, orientation, cell sheet organization and Golgi complex polarization at the cell migration front (By similarity). Protects SCRIB from proteasomal degradation and facilitates its localization to intermediate filaments in a cell contact-mediated manner (By similarity).
Cellular Location	Cytoplasm. Cytoplasm, cytoskeleton. Nucleus matrix {ECO:0000250 UniProtKB:P31000}. Cell membrane {ECO:0000250 UniProtKB:P20152}
Tissue Location	Highly expressed in fibroblasts, some expression in T- and B-lymphocytes, and little or no expression in Burkitt's lymphoma cell lines. Expressed in many hormone-independent mammary carcinoma cell lines.
