

ACTH

Mouse Monoclonal antibody(Mab) Catalog # AD80249

Product Information

Application IHC-P **Primary Accession** P01189 Reactivity Human Host Mouse Clonality Monoclonal **Clone Names** 132H5D1 **Calculated MW** 29424

Additional Information

Gene ID 5443 **Gene Name POMC**

Other Names Pro-opiomelanocortin, POMC, Corticotropin-lipotropin, NPP, Melanotropin

> gamma, Gamma-MSH, Potential peptide, Corticotropin, Adrenocorticotropic hormone, ACTH, Melanocyte-stimulating hormone alpha, Alpha-MSH,

Melanotropin alpha, Corticotropin-like intermediary peptide, CLIP, Lipotropin beta, Beta-LPH, Lipotropin gamma, Gamma-LPH, Melanocyte-stimulating

hormone beta, Beta-MSH, Melanotropin beta, Beta-endorphin,

Met-enkephalin, POMC

Dilution IHC-P~~Ready-to-use

Storage Maintain refrigerated at 2-8°C.

ACTH Antibody is for research use only and not for use in diagnostic or **Precautions**

therapeutic procedures.

Protein Information

Name **POMC**

Function [Corticotropin]: Stimulates the adrenal glands to release cortisol.

[Melanocyte-stimulating hormone beta]: Increases the pigmentation of skin

by increasing melanin production in melanocytes. [Met-enkephalin]:

Endogenous opiate.

Cellular Location Secreted {ECO:0000250 | UniProtKB:P01193}. Note=Melanocyte-stimulating

hormone alpha and beta-endorphin are stored in separate granules in hypothalamic POMC neurons, suggesting that secretion may be under the control of different regulatory mechanisms {ECO:0000250 | UniProtKB:P01193}

ACTH and MSH are produced by the pituitary gland. **Tissue Location**
