

Arginase-1

Rabbit Monoclonal antibody(Mab)
Catalog # AD80387

Product Information

Application IHC-P
Primary Accession P05089
Reactivity Human
Host Rabbit
Clonality Monoclonal
Clone Names 114G7B3
Calculated MW 34735

Additional Information

Gene ID 383 Gene Name ARG1

Other Names Arginase-1, 3.5.3.1, Liver-type arginase, Type I arginase, ARG1

Dilution IHC-P~~Ready-to-use

Storage Maintain refrigerated at 2-8°C.

Precautions Arginase-1 Antibody is for research use only and not for use in diagnostic or

therapeutic procedures.

Protein Information

Name ARG1

Function Key element of the urea cycle converting L-arginine to urea and L-ornithine,

which is further metabolized into metabolites proline and polyamides that

drive collagen synthesis and bioenergetic pathways critical for cell

proliferation, respectively; the urea cycle takes place primarily in the liver and,

to a lesser extent, in the kidneys.

Cellular Location Cytoplasmic granule. Note=Localized in azurophil granules of

neutrophils (PubMed:15546957)

Tissue Location Within the immune system initially reported to be selectively expressed in

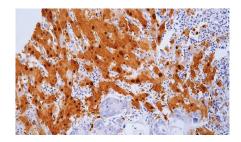

granulocytes (polymorphonuclear leukocytes [PMNs]) (PubMed:15546957).

Also detected in macrophages mycobacterial granulomas

(PubMed:23749634). Expressed in group2 innate lymphoid cells (ILC2s) during

lung disease (PubMed:27043409)
