

CD₆

Mouse Monoclonal antibody(Mab)
Catalog # AD80406

Product Information

Application IHC-P
Primary Accession P30203
Reactivity Human
Host Mouse
Clonality Monoclonal
Clone Names 585A3B7
Calculated MW 71801

Additional Information

Gene ID 923 Gene Name CD6

Other Names T-cell differentiation antigen CD6, T12, TP120, CD6, Soluble CD6, CD6

(HGNC:1691)

Dilution IHC-P~~Ready-to-use

Storage Maintain refrigerated at 2-8°C.

Precautions CD6 Antibody is for research use only and not for use in diagnostic or

therapeutic procedures.

Protein Information

Name CD6 (<u>HGNC:1691</u>)

Function Cell adhesion molecule that mediates cell-cell contacts and regulates T-cell

responses via its interaction with ALCAM/CD166 (PubMed: 15048703,

PubMed: 15294938, PubMed: 16352806, PubMed: 16914752,

PubMed: 24584089, PubMed: 24945728). Contributes to signaling cascades triggered by activation of the TCR/CD3 complex (PubMed: 24584089). Functions as a costimulatory molecule; promotes T-cell activation and proliferation (PubMed: 15294938, PubMed: 16352806, PubMed: 16914752). Contributes to the formation and maturation of the immunological synapse (PubMed: 15294938, PubMed: 16352806). Functions as a calcium-dependent

pattern receptor that binds and aggregates both Gram-positive and Gram-negative bacteria. Binds both lipopolysaccharide (LPS) from

Gram-negative bacteria and lipoteichoic acid from Gram-positive bacteria (PubMed: 17601777). LPS binding leads to the activation of signaling cascades and down-stream MAP kinases (PubMed: 17601777). Mediates activation of the inflammatory response and the secretion of pro-inflammatory cytokines

in response to LPS (PubMed: 17601777).

Cellular Location

Tissue Location

Cell membrane; Single-pass type I membrane protein. Note=Detected at the immunological synapse, i.e, at the contact zone between antigen-presenting dendritic cells and T-cells (PubMed:15294938, PubMed:16352806). Colocalizes with the TCR/CD3 complex at the immunological synapse (PubMed:15294938) Detected on thymocytes (PubMed:15294938). Detected on peripheral blood T-cells (PubMed:15048703, PubMed:16352806) Detected on natural killer (NK) cells (PubMed:16352806). Soluble CD6 is detected in blood serum (at protein level) (PubMed:17601777). Detected in spleen, thymus, appendix, lymph node and peripheral blood leukocytes (PubMed:9013954). Expressed by thymocytes, mature T-cells, a subset of B-cells known as B-1 cells, and by some cells in the brain
