

CD45RA

Mouse Monoclonal antibody(Mab)
Catalog # AD80523

Product Information

Application IHC-P
Primary Accession P08575
Reactivity Human
Host Mouse
Clonality Monoclonal
Clone Names 314E2N5
Calculated MW 147486

Additional Information

Gene ID 5788

Other Names Receptor-type tyrosine-protein phosphatase C, 3.1.3.48, Leukocyte common

antigen, L-CA, T200, CD45, PTPRC (HGNC:9666), CD45

Dilution IHC-P~~Ready-to-use

Storage Maintain refrigerated at 2-8°C.

Protein Information

Name PTPRC (HGNC:9666)

Synonyms CD45

Function Protein tyrosine-protein phosphatase required for T-cell activation through

coactivation upon binding to DPP4. The first PTPase domain has enzymatic activity, while the second one seems to affect the substrate specificity of the first one. Upon T-cell activation, recruits and dephosphorylates SKAP1 and FYN. Dephosphorylates LYN, and thereby modulates LYN activity (By similarity). Interacts with CLEC10A at antigen presenting cell-T cell contact; CLEC10A on immature dendritic cells recognizes Tn antigen- carrying PTPRC/CD45 receptor on effector T cells and modulates T cell activation

the antigen receptor (PubMed:35767951). Acts as a positive regulator of T-cell

threshold to limit autoreactivity.

Cellular Location Cell membrane; Single-pass type I membrane protein. Membrane raft.

Synapse. Note=Colocalized with DPP4 in membrane rafts.

Tissue Location Isoform 1: Detected in thymocytes. Isoform 2: Detected in thymocytes.

Isoform 3: Detected in thymocytes. Isoform 4: Not detected in thymocytes. Isoform 5: Detected in thymocytes. Isoform 6: Not detected in thymocytes. Isoform 7: Detected in thymocytes Isoform 8: Not detected in thymocytes.
