

# KD-Validated Anti-Retinoid X receptor alpha Rabbit Monoclonal Antibody

Rabbit monoclonal antibody

Catalog # AGI1282

## Product Information

---

|                          |                                                                                                                                                                                                                                  |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application</b>       | WB, FC, ICC                                                                                                                                                                                                                      |
| <b>Primary Accession</b> | <a href="#">P19793</a>                                                                                                                                                                                                           |
| <b>Reactivity</b>        | Rat, Human, Mouse                                                                                                                                                                                                                |
| <b>Clonality</b>         | Monoclonal                                                                                                                                                                                                                       |
| <b>Isotype</b>           | Rabbit IgG                                                                                                                                                                                                                       |
| <b>Clone Names</b>       | 23GB 2815                                                                                                                                                                                                                        |
| <b>Calculated MW</b>     | 50811                                                                                                                                                                                                                            |
| <b>Gene Name</b>         | RXRA                                                                                                                                                                                                                             |
| <b>Aliases</b>           | RXRA; Retinoid X Receptor Alpha; NR2B1; Nuclear Receptor Subfamily 2 Group B Member 1; Retinoic Acid Receptor RXR-Alpha; RXR-Alpha; RXRalpha; Retinoid X Nuclear Receptor Alpha; Retinoid X Receptor, Alpha; RXR-ALPHA; RXRALPHA |
| <b>Immunogen</b>         | A synthesized peptide derived from human Retinoid X Receptor alpha                                                                                                                                                               |

## Additional Information

---

|                    |                                                                                                                         |

| <b>Name</b>     | RXRA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Synonyms</b> | NR2B1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Function</b> | Receptor for retinoic acid that acts as a transcription factor (PubMed: <a href="#">10874028</a> , PubMed: <a href="#">11162439</a> , PubMed: <a href="#">11915042</a> , PubMed: <a href="#">37478846</a> ). Forms homo- or heterodimers with retinoic acid receptors (RARs) and binds to target response elements in response to their ligands, all-trans or 9-cis retinoic acid, to regulate gene expression in various biological processes (PubMed: <a href="#">10195690</a> , PubMed: <a href="#">11162439</a> , PubMed: <a href="#">11915042</a> , PubMed: <a href="#">16107141</a> , PubMed: <a href="#">17761950</a> , PubMed: <a href="#">18800767</a> , PubMed: <a href="#">19167885</a> , PubMed: <a href="#">28167758</a> , PubMed: <a href="#">37478846</a> ). The RAR/RXR heterodimers bind to the retinoic acid response elements (RARE) composed of tandem 5'-AGGTCA-3' sites known as DR1-DR5 to regulate transcription (PubMed: <a href="#">10195690</a> , PubMed: <a href="#">11162439</a> , PubMed: <a href="#">11915042</a> , PubMed: <a href="#">17761950</a> , PubMed: <a href="#">28167758</a> ). The high affinity ligand for retinoid X receptors (RXRs) is 9-cis retinoic acid (PubMed: <a href="#">1310260</a> ). |

In the absence of ligand, the RXR-RAR heterodimers associate with a multiprotein complex containing transcription corepressors that induce histone deacetylation, chromatin condensation and transcriptional suppression (PubMed:[20215566](#)). On ligand binding, the corepressors dissociate from the receptors and coactivators are recruited leading to transcriptional activation (PubMed:[20215566](#), PubMed:[37478846](#), PubMed:[9267036](#)). Serves as a common heterodimeric partner for a number of nuclear receptors, such as RARA, RARB and PPARA (PubMed:[10195690](#), PubMed:[11915042](#), PubMed:[28167758](#), PubMed:[29021580](#)). The RXRA/RARB heterodimer can act as a transcriptional repressor or transcriptional activator, depending on the RARE DNA element context (PubMed:[29021580](#)). The RXRA/PPARA heterodimer is required for PPARA transcriptional activity on fatty acid oxidation genes such as ACOX1 and the P450 system genes (PubMed:[10195690](#)). Together with RARA, positively regulates microRNA-10a expression, thereby inhibiting the GATA6/VCAM1 signaling response to pulsatile shear stress in vascular endothelial cells (PubMed:[28167758](#)). Acts as an enhancer of RARA binding to RARE DNA element (PubMed:[28167758](#)). May facilitate the nuclear import of heterodimerization partners such as VDR and NR4A1 (PubMed:[12145331](#), PubMed:[15509776](#)). Promotes myelin debris phagocytosis and remyelination by macrophages (PubMed:[26463675](#)). Plays a role in the attenuation of the innate immune system in response to viral infections, possibly by negatively regulating the transcription of antiviral genes such as type I IFN genes (PubMed:[25417649](#)). Involved in the regulation of calcium signaling by repressing ITPR2 gene expression, thereby controlling cellular senescence (PubMed:[30216632](#)).

#### Cellular Location

Nucleus {ECO:0000255 | PROSITE-ProRule:PRU00407, ECO:0000269 | PubMed:10874028, ECO:0000269 | PubMed:11915042, ECO:0000269 | PubMed:12145331, ECO:0000269 | PubMed:15509776, ECO:0000269 | PubMed:17761950, ECO:0000269 | PubMed:28167758}. Cytoplasm Mitochondrion. Note=Localization to the nucleus is enhanced by vitamin D3 (PubMed:15509776). Nuclear localization may be enhanced by the interaction with heterodimerization partner VDR (PubMed:12145331). Translocation to the mitochondrion upon interaction with NR4A1 (PubMed:15509776, PubMed:17761950). Increased nuclear localization upon pulsatile shear stress (PubMed:28167758)

#### Tissue Location

Expressed in lung fibroblasts (at protein level) (PubMed:30216632). Expressed in monocytes (PubMed:26463675). Highly expressed in liver, also found in kidney and brain (PubMed:14702039, PubMed:2159111, PubMed:24275569).
