

# KD-Validated Anti-HNRNPA0 Mouse Monoclonal Antibody

Mouse monoclonal antibody

Catalog # AGI1954

## Product Information

---

|                          |                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------|
| <b>Application</b>       | WB, FC, ICC                                                                                  |
| <b>Primary Accession</b> | <a href="#">Q13151</a>                                                                       |
| <b>Reactivity</b>        | Rat, Human, Mouse                                                                            |
| <b>Clonality</b>         | Monoclonal                                                                                   |
| <b>Isotype</b>           | Mouse IgG1                                                                                   |
| <b>Clone Names</b>       | 24GB6620                                                                                     |
| <b>Calculated MW</b>     | 30841                                                                                        |
| <b>Gene Name</b>         | HNRNPA0                                                                                      |
| <b>Aliases</b>           | HNRNPA0; Heterogeneous Nuclear Ribonucleoprotein A0; HNRPA0; HnRNP A0; HnRNA Binding Protein |
| <b>Immunogen</b>         | Recombinant protein of human HNRNPA0                                                         |

## Additional Information

---

|                    |                                                                       |
|--------------------|-----------------------------------------------------------------------|
| <b>Gene ID</b>     | 10949                                                                 |
| <b>Other Names</b> | Heterogeneous nuclear ribonucleoprotein A0, hnRNP A0, HNRNPA0, HNRPA0 |

## Protein Information

---

|                          |                                                                                                                                                                        |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Name</b>              | HNRNPA0                                                                                                                                                                |
| <b>Synonyms</b>          | HNRPA0                                                                                                                                                                 |
| <b>Function</b>          | mRNA-binding component of ribonucleosomes. Specifically binds AU-rich element (ARE)-containing mRNAs. Involved in post- transcriptional regulation of cytokines mRNAs. |
| <b>Cellular Location</b> | Nucleus. Note=Component of ribonucleosomes.                                                                                                                            |
