

CD50 / ICAM-3 Antibody - With BSA and Azide

Mouse Monoclonal Antibody [Clone 101-1D2] Catalog # AH11489

Product Information

Application IHC, IF, FC
Primary Accession P32942
Other Accession 3385, 354563
Reactivity Human
Host Mouse
Clonality Monoclonal

Isotype Mouse / IgG2a, kappa

Clone Names 101-1D2 Calculated MW 59541

Additional Information

Gene ID 3385

Other Names Intercellular adhesion molecule 3, ICAM-3, CDw50, ICAM-R, CD50, ICAM3

Application Note IHC~~1:100~500 IF~~1:50~200 FC~~1:10~50

Storage Store at 2 to 8°C.Antibody is stable for 24 months.

Precautions CD50 / ICAM-3 Antibody - With BSA and Azide is for research use only and

not for use in diagnostic or therapeutic procedures.

Protein Information

Name ICAM3

Function ICAM proteins are ligands for the leukocyte adhesion protein LFA-1 (integrin

alpha-L/beta-2) (PubMed: 1448173). ICAM3 is also a ligand for integrin alpha-D/beta-2. In association with integrin alpha- L/beta-2, contributes to apoptotic neutrophil phagocytosis by macrophages (PubMed: 23775590).

Cellular Location Membrane; Single-pass type I membrane protein.

Tissue Location Leukocytes.

Background

Recognizes an N-glycosylated glycoprotein of 120kDa with intra-chain disulfide bonds, identified as CD50 or ICAM-3 (WS: IV & V). Its epitope localizes in the D2 extracellular domain and is resistant to neuraminidase

and proteases. CD50 is the major ligand for LFA-1 (CD11a/CD18) and may have signalling role to increase adhesion. It is expressed on thymocytes and T lymphocytes and is resistant to treatment with phosphatidylinositol (PI) phospholipase C. This MAb inhibits primary mixed lymphocyte culture (MLC) but not secondary MLC, cytotoxicity or proliferation induced by mitogens. It blocks binding of NK1-L16 stimulated T cells to L cells expressing CD50. This MAb is excellent for staining of formalin/paraffin tissues.
