

# Cytokeratin 7 (KRT7) (Glandular and Transitional Epithelial Marker) Antibody - With BSA and Azide

Mouse Monoclonal Antibody [Clone KRT7/760 ] Catalog # AH11650

#### **Product Information**

**Application** IHC, IF, FC **Primary Accession** P08729 3855, 411501 Other Accession Reactivity Human Host Mouse Clonality Monoclonal Isotype Mouse / IgG1 **Clone Names** KRT7/760 **Calculated MW** 51386

### **Additional Information**

Gene ID 3855

Other Names Keratin, type II cytoskeletal 7, Cytokeratin-7, CK-7, Keratin-7, K7, Sarcolectin,

Type-II keratin Kb7, KRT7, SCL

**Application Note** IHC~~1:100~500 IF~~1:50~200 FC~~1:10~50

**Storage** Store at 2 to 8°C.Antibody is stable for 24 months.

**Precautions** Cytokeratin 7 (KRT7) (Glandular and Transitional Epithelial Marker) Antibody

- With BSA and Azide is for research use only and not for use in diagnostic or

therapeutic procedures.

#### **Protein Information**

Name KRT7

**Synonyms** SCL

**Function** Blocks interferon-dependent interphase and stimulates DNA synthesis in

cells. Involved in the translational regulation of the human papillomavirus

type 16 E7 mRNA (HPV16 E7).

Cellular Location Cytoplasm.

**Tissue Location** Expressed in cultured epidermal, bronchial and mesothelial cells but absent

in colon, ectocervix and liver. Observed throughout the glandular cells in the junction between stomach and esophagus but is absent in the esophagus.

## **Background**

It recognizes an intermediate filament protein (IFP) of 55kDa, which is identified as cytokeratin 7. This MAb is highly specific to cytokeratin 7 and shows no cross-reaction with other IFPs. Cytokeratin 7 is a basic cytokeratin, which is found in most glandular and transitional epithelia but not in the stratified squamous epithelia. Keratin 7 is expressed in the epithelial cells of ovary, lung, and breast but not of colon, prostate, or gastrointestinal tract. This MAb is highly useful in distinguishing ovarian carcinomas (keratin 7+) from colon carcinomas (keratin 7-).
