

Myeloid-Associated Differentiation Marker (MYADM) Antibody - With BSA and Azide

Mouse Monoclonal Antibody [Clone MYADM/971]

Catalog # AH12602

Product Information

Application	IHC, IF, FC
Primary Accession	Q96S97
Other Accession	91663 , 380906
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	Mouse / IgG1
Clone Names	MYADM/971
Calculated MW	35274

Additional Information

Gene ID	91663
Other Names	Myeloid-associated differentiation marker, Protein SB135, MYADM
Application Note	IHC~~1:100~500 IF~~1:50~200 FC~~1:10~50
Storage	Store at 2 to 8°C.Antibody is stable for 24 months.
Precautions	Myeloid-Associated Differentiation Marker (MYADM) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	MYADM
Cellular Location	Membrane; Multi-pass membrane protein
Tissue Location	Widely expressed. Not detected in thymus.

Background

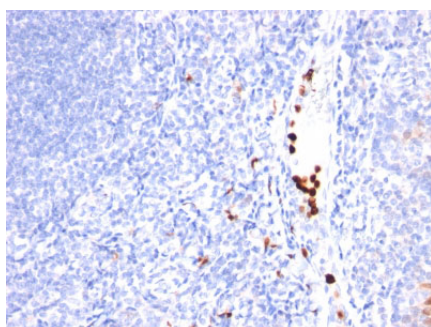

Recognizes a myeloid associated differentiation antigen in the cytoplasm of mature granulocytes. It shows no reactivity with any other cell type in human tissues. Markers of myeloid cells are useful in the identification of different levels of cellular differentiation. It reacts with early precursor and mature forms of human and monkey myeloid cells. This MAb is useful for the detection of myeloid leukemias and

granulocytic sarcomas. It can be used as a marker of granulocytes in normal tissues or inflammatory processes.
