DLX5 antibody - N-terminal region

Rabbit Polyclonal Antibody Catalog # AI10025

Product Information

Application WB, IHC **Primary Accession** WB, IHC

Other Accession P56178, NP 005212, NM 005221

Reactivity Human, Mouse, Rat, Rabbit, Zebrafish, Pig, Dog, Guinea Pig, Horse, Bovine

Predicted Human, Mouse, Rat, Rabbit, Pig, Dog, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 31540

Additional Information

Gene ID 1749

Alias Symbol SHFM1D

Other Names Homeobox protein DLX-5, DLX5

Target/Specificity DLX5 is a member of a homeobox transcription factor gene family similiar to

the Drosophila distal-less gene. This protein may play a role in bone

development and fracture healing. Mutation in its gene, which is located in a tail-to-tail configuration with another member of the family on the long arm of chromosome 7, may be associated with split-hand/split-foot malformation. This gene encodes a member of a homeobox transcription factor gene family similiar to the Drosophila distal-less gene. The encoded protein may play a role in bone development and fracture healing. Mutation in this gene, which is located in a tail-to-tail configuration with another member of the family on the long arm of chromosome 7, may be associated with split-hand/split-foot malformation. Publication Note: This RefSeq record includes a subset of the publications that are available for this gene. Please see the Entrez Gene

record to access additional publications.

Format Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium

azide and 2% sucrose.

Reconstitution & Storage Add 50 ul of distilled water. Final anti-DLX5 antibody concentration is 1 mg/ml

in PBS buffer with 2% sucrose. For longer periods of storage, store at -20°C.

Avoid repeat freeze-thaw cycles.

Precautions DLX5 antibody - N-terminal region is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name DLX5

Function Transcriptional factor involved in bone development. Acts as an immediate

early BMP-responsive transcriptional activator essential for osteoblast differentiation. Stimulates ALPL promoter activity in a RUNX2-independent manner during osteoblast differentiation. Stimulates SP7 promoter activity during osteoblast differentiation. Promotes cell proliferation by up-regulating

MYC promoter activity. Involved as a positive regulator of both

chondrogenesis and chondrocyte hypertrophy in the endochondral skeleton. Binds to the homeodomain-response element of the ALPL and SP7 promoter. Binds to the MYC promoter. Requires the 5'-TAATTA-3' consensus sequence

for DNA-binding.

Cellular Location Nucleus {ECO:0000255 | PROSITE-ProRule:PRU00108}.

Background

This is a rabbit polyclonal antibody against DLX5. It was validated on Western Blot using a cell lysate as a positive control. Abgent strives to provide antibodies covering each member of a whole protein family of your interest. We also use our best efforts to provide you antibodies recognize various epitopes of a target protein. For availability of antibody needed for your experiment, please inquire (sales@abgent.com).

DLX5 antibody - N-terminal region (AI10025) in Human THP-1 cells using Western Blot

WB Suggested Anti-DLX5 Antibody Titration: 0.2-1 μ g/ml

ELISA Titer: 1:312500

Positive Control: THP-1 cell lysate

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
