## Protein Information

---

<b>Name</b>	FHL2
<b>Synonyms</b>	DRAL, SLIM3
<b>Function</b>	May function as a molecular transmitter linking various signaling pathways to transcriptional regulation. Negatively regulates the transcriptional repressor E4F1 and may function in cell growth. Inhibits the transcriptional activity of FOXO1 and its apoptotic function by enhancing the interaction of FOXO1 with SIRT1 and FOXO1 deacetylation. Negatively regulates the

calcineurin/NFAT signaling pathway in cardiomyocytes (PubMed:[28717008](#)).

**Cellular Location**

{ECO:0000250|UniProtKB:O35115}

**Tissue Location**

Expressed in skeletal muscle and heart.

## Background

---

This is a rabbit polyclonal antibody against FHL2. It was validated on Western Blot and immunohistochemistry by Abgent. At Abgent we manufacture rabbit polyclonal antibodies on a large scale (200-1000 products/month) of high throughput manner. Our antibodies are peptide based and protein family oriented. We usually provide antibodies covering each member of a whole protein family of your interest. We also use our best efforts to provide you antibodies recognize various epitopes of a target protein. For availability of antibody needed for your experiment, please inquire ([sales@abgent.com](mailto:sales@abgent.com)).
