

# NPAS1 antibody - middle region

Rabbit Polyclonal Antibody Catalog # AI10409

### **Product Information**

| Application       | WB                                  |
|-------------------|-------------------------------------|
| Primary Accession | <u>Q99742</u>                       |
| Other Accession   | <u>NM_002517</u> , <u>NP_002508</u> |
| Reactivity        | Human                               |
| Predicted         | Human                               |
| Host              | Rabbit                              |
| Clonality         | Polyclonal                          |
| Calculated MW     | 62702                               |
|                   |                                     |

## **Additional Information**

| Gene ID                     | 4861                                                                                                                                                                                                                                                                         |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Alias Symbol<br>Other Names | MOP5, PASD5, bHLHe11<br>Neuronal PAS domain-containing protein 1, Neuronal PAS1,<br>Basic-helix-loop-helix-PAS protein MOP5, Class E basic helix-loop-helix protein<br>11, bHLHe11, Member of PAS protein 5, PAS domain-containing protein 5,<br>NPAS1, BHLHE11, MOP5, PASD5 |
| Format                      | Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.                                                                                                                                                                            |
| Reconstitution & Storage    | Add 50 ul of distilled water. Final anti-NPAS1 antibody concentration is 1<br>mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at<br>20°C. Avoid repeat freeze-thaw cycles.                                                                         |
| Precautions                 | NPAS1 antibody - middle region is for research use only and not for use in diagnostic or therapeutic procedures.                                                                                                                                                             |

## **Protein Information**

| Name     | NPAS1                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Synonyms | BHLHE11, MOP5, PASD5                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Function | May control regulatory pathways relevant to schizophrenia and to psychotic<br>illness. May play a role in late central nervous system development by<br>modulating EPO expression in response to cellular oxygen level (By similarity).<br>Forms a heterodimer that binds core DNA sequence 5'-TACGTG-3' within the<br>hypoxia response element (HRE) leading to transcriptional repression on its<br>target gene TH (By similarity). |
