

Acd antibody - C-terminal region

Rabbit Polyclonal Antibody Catalog # AI11035

Product Information

Application WB Primary Accession Q5EE38

Other Accession NM 001012638, NP 001012656

Reactivity Human, Mouse, Rat, Dog, Horse, Bovine

Predicted Human, Mouse, Rat, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 44713

Additional Information

Gene ID 497652

Other Names Adrenocortical dysplasia protein, Acd

Format Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium

azide and 2% sucrose.

Reconstitution & Storage Add 50 ul of distilled water. Final anti-Acd antibody concentration is 1 mg/ml

in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C.

Avoid repeat freeze-thaw cycles.

Precautions Acd antibody - C-terminal region is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name Acd {ECO:0000312 | MGI:MGI:87873}

Function Component of the shelterin complex (telosome) that is involved in the

regulation of telomere length and protection. Shelterin associates with arrays of double-stranded TTAGGG repeats added by telomerase and protects chromosome ends. Without its protective activity, telomeres are no longer hidden from the DNA damage surveillance and chromosome ends are inappropriately processed by DNA repair pathways. Promotes binding of POT1 to single-stranded telomeric DNA. Modulates the inhibitory effects of POT1 on telomere elongation. The ACD-POT1 heterodimer enhances telomere

elongation by recruiting telomerase to telomeres and increasing its processivity (By similarity). May play a role in organogenesis

(PubMed: 15537664).

Cellular Location Nucleus {ECO:0000250 | UniProtKB:Q96AP0}. Chromosome, telomere
