

# CIITA antibody - middle region

Rabbit Polyclonal Antibody Catalog # AI11344

#### **Product Information**

Application WB Primary Accession P33076

Other Accession NM 000246, NP 000237

**Reactivity** Human, Mouse, Rat, Rabbit, Pig, Dog, Horse, Bovine

**Predicted** Human, Rat, Rabbit, Chicken, Horse, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 123415

### **Additional Information**

**Gene ID** 4261

Alias Symbol C2TA, CIITA IV, MHC2TA, NLRA, CIITAIV

Other Names MHC class II transactivator, CIITA, 2.3.1.-, 2.7.11.1, CIITA, MHC2TA

Format Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium

azide and 2% sucrose.

**Reconstitution & Storage** Add 50 ul of distilled water. Final anti-CIITA antibody concentration is 1 mg/ml

in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C.

Avoid repeat freeze-thaw cycles.

**Precautions** CIITA antibody - middle region is for research use only and not for use in

diagnostic or therapeutic procedures.

#### **Protein Information**

Name CIITA ( HGNC:7067)

Synonyms MHC2TA

**Function** Essential for transcriptional activity of the HLA class II promoter; activation is

via the proximal promoter (PubMed: 16600381, PubMed: 17493635,

PubMed:7749984, PubMed:8402893). Does not bind DNA (PubMed:16600381, PubMed:17493635, PubMed:7749984, PubMed:8402893). May act in a coactivator-like fashion through protein-protein interactions by contacting factors binding to the proximal MHC class II promoter, to elements of the transcription machinery, or both PubMed:8402893, PubMed:7749984, (PubMed:16600381, PubMed:17493635). Alternatively it may activate HLA class II transcription by modifying proteins that bind to the MHC class II

promoter (PubMed:16600381, PubMed:17493635, PubMed:7749984, PubMed:8402893). Also mediates enhanced MHC class I transcription; the promoter element requirements for CIITA-mediated transcription are distinct from those of constitutive MHC class I transcription, and CIITA can functionally replace TAF1 at these genes. Activates CD74 transcription (PubMed:32855215). Exhibits intrinsic GTP- stimulated acetyltransferase activity (PubMed:11172716). Exhibits serine/threonine protein kinase activity: can phosphorylate the TFIID component TAF7, the RAP74 subunit of the general transcription factor TFIIF, histone H2B at 'Ser-37' and other histones (in vitro) (PubMed:24036077). Has antiviral activity against Ebola virus and coronaviruses, including SARS-CoV-2 (PubMed:32855215). Induces resistance by up-regulation of the p41 isoform of CD74, which blocks cathepsin-mediated cleavage of viral glycoproteins, thereby preventing viral fusion (PubMed:32855215).

**Cellular Location** 

Nucleus. Nucleus, PML body. Note=Recruited to PML body by PML
