

ABHD5 antibody - N-terminal region

Rabbit Polyclonal Antibody Catalog # AI12020

Product Information

WB
Q <u>8WTS1</u>
<u>NM_016006, NP_057090</u>
Human, Mouse, Rat, Rabbit, Pig, Dog, Horse, Bovine, Sheep
Human, Mouse, Rat, Rabbit, Pig, Dog, Horse, Bovine, Sheep
Rabbit
Polyclonal
39096

Additional Information

Gene ID	51099
Alias Symbol Other Names	CDS, CGI58, IECN2, MGC8731, NCIE2 1-acylglycerol-3-phosphate O-acyltransferase ABHD5, 2.3.1.51, Abhydrolase domain-containing protein 5, Lipid droplet-binding protein CGI-58, ABHD5, NCIE2
Format	Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.
Reconstitution & Storage	Add 100 ul of distilled water. Final anti-ABHD5 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.
Precautions	ABHD5 antibody - N-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

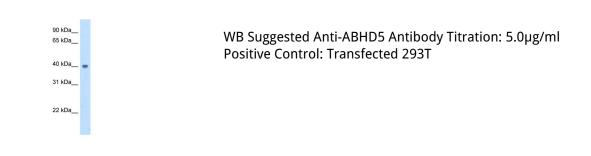

Name	ABHD5 (<u>HGNC:21396</u>)
Synonyms	NCIE2
Function	Coenzyme A-dependent lysophosphatidic acid acyltransferase that catalyzes the transfer of an acyl group on a lysophosphatidic acid (PubMed: <u>18606822</u>). Functions preferentially with 1-oleoyl- lysophosphatidic acid followed by 1-palmitoyl-lysophosphatidic acid, 1- stearoyl-lysophosphatidic acid and 1-arachidonoyl-lysophosphatidic acid as lipid acceptor. Functions preferentially with arachidonoyl-CoA followed by oleoyl-CoA as acyl group donors (By similarity). Functions in phosphatidic acid biosynthesis

	(PubMed: <u>18606822</u>). May regulate the cellular storage of triacylglycerol through activation of the phospholipase PNPLA2 (PubMed: <u>16679289</u>). Involved in keratinocyte differentiation (PubMed: <u>18832586</u>). Regulates lipid droplet fusion (By similarity).
Cellular Location	Cytoplasm. Lipid droplet {ECO:0000250 UniProtKB:Q9DBL9}. Cytoplasm, cytosol {ECO:0000250 UniProtKB:Q9DBL9}. Note=Colocalized with PLIN and ADRP on the surface of lipid droplets. The localization is dependent upon the metabolic status of the adipocytes and the activity of PKA (By similarity).
Tissue Location	Widely expressed in various tissues, including lymphocytes, liver, skeletal muscle and brain. Expressed by upper epidermal layers and dermal fibroblasts in skin, hepatocytes and neurons (at protein level).

References

Bruno, C., (2008) Biochem. Biophys. Res. Commun. 369 (4), 1125-1128 Reconstitution and Storage: For short term use, store at 2-8C up to 1 week. For long term storage, store at -20C in small aliquots to prevent freeze-thaw cycles.
