Protein Information

Name	DCUN1D1 (HGNC:18184)
Function	Part of an E3 ubiquitin ligase complex for neddylation (PubMed: 18826954). Promotes neddylation of cullin components of E3 cullin-RING ubiquitin ligase complexes (PubMed: 19617556 , PubMed: 23201271 , PubMed: 23401859 , PubMed: 26906416). Acts by binding to cullin-RBX1 complexes in the cytoplasm and promoting their nuclear translocation, enhancing recruitment of E2-NEDD8 (UBE2M-NEDD8) thioester to the complex, and optimizing the orientation of proteins in the complex to allow efficient transfer of NEDD8 from the E2 to the cullin substrates. Involved in the release of inhibitory effects of CAND1 on cullin-RING ligase E3 complex assembly and activity

(PubMed:[25349211](#), PubMed:[28581483](#)). Also acts as an oncogene facilitating malignant transformation and carcinogenic progression (By similarity).

Cellular Location

Nucleus. Cytoplasm Note=The ubiquitinated form is localized in the cytoplasm

Tissue Location

Expressed in pancreas, kidney, placenta, brain and heart. Weakly or not expressed in liver, skeletal muscle and lung Strongly overexpressed in thyroid tumors, bronchioloalveolar carcinomas, and malignant tissues of squamous cell carcinoma of the oral tongue. Not overexpressed in aggressive adrenocortical carcinomas
