

Abcb8 Antibody - middle region

Rabbit Polyclonal Antibody Catalog # AI12310

Product Information

Application WB Primary Accession Q9CXJ4

Other Accession <u>NM 029020</u>, <u>NP 083296</u>

ReactivityHuman, Mouse, Rat, Rabbit, Zebrafish, Dog, Guinea Pig, Horse, Bovine **Predicted**Human, Mouse, Rat, Rabbit, Zebrafish, Pig, Dog, Guinea Pig, Horse, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 78000

Additional Information

Gene ID 74610

Alias Symbol 4833412N02Rik, AA409895

Other Names ATP-binding cassette sub-family B member 8, mitochondrial, Abcb8

Format Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium

azide and 2% sucrose.

Reconstitution & Storage Add 50 ul of distilled water. Final anti-Abcb8 antibody concentration is 1

mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at

20°C. Avoid repeat freeze-thaw cycles.

Precautions Abcb8 Antibody - middle region is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name Abcb8 {ECO:0000303 | PubMed:22375032, ECO:0000312 | MGI:MGI:1351667}

Function ATP-binding subunit of the mitochondrial ATP-gated potassium channel

(mitoK(ATP)). Together with pore-forming subunit CCDC51/MITOK of the mitoK(ATP) channel, mediates ATP-dependent potassium currents across the mitochondrial inner membrane. An increase in ATP intracellular levels closes the channel, inhibiting K(+) transport, whereas a decrease in ATP levels enhances K(+) uptake in the mitochondrial matrix (By similarity). Plays a role

in mitochondrial iron transport (PubMed:<u>22375032</u>). Required for maintenance of normal cardiac function, possibly by influencing

mitochondrial iron export and regulating the maturation of cytosolic iron

sulfur cluster-containing enzymes (PubMed: 22375032).
