

AMN antibody - N-terminal region

Rabbit Polyclonal Antibody Catalog # AI13110

Product Information

Application WB Primary Accession Q9BX|7

Other Accession NM_030943, NP_112205

Reactivity Human, Mouse, Rat, Zebrafish, Pig, Dog, Guinea Pig, Horse, Bovine

Predicted Human, Mouse, Rat, Pig, Dog, Guinea Pig, Horse, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 47754

Additional Information

Gene ID 81693

Alias Symbol PRO1028

Other Names Protein amnionless, AMN

Format Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium

azide and 2% sucrose.

Reconstitution & Storage Add 50 ul of distilled water. Final anti-AMN antibody concentration is 1 mg/ml

in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C.

Avoid repeat freeze-thaw cycles.

Precautions AMN antibody - N-terminal region is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name AMN

Function Membrane-bound component of the endocytic receptor formed by AMN and

CUBN (PubMed: <u>14576052</u>, PubMed: <u>29402915</u>, PubMed: <u>30523278</u>). Required

for normal CUBN glycosylation and trafficking to the cell surface

(PubMed:<u>14576052</u>, PubMed:<u>29402915</u>). The complex formed by AMN and CUBN is required for efficient absorption of vitamin B12 (PubMed:<u>12590260</u>, PubMed:<u>14576052</u>, PubMed:<u>26040326</u>). Required for normal CUBN-mediated

protein transport in the kidney (Probable).

Cellular Location [Isoform 1]: Apical cell membrane; Single-pass type I membrane protein. Cell

membrane; Single-pass type I membrane protein. Endosome membrane

Membrane, coated pit

Tissue Location

Detected in proximal tubules in the kidney cortex (at protein level) (PubMed:14576052, PubMed:29402915). Long isoforms are highly expressed in small intestine, colon and kidney (renal proximal tubule epithelial cells). Shorter isoforms are detected at lower levels in testis, thymus and peripheral blood leukocytes
