

# BRCC3 antibody - C-terminal region

Rabbit Polyclonal Antibody Catalog # AI14755

## **Product Information**

Application WB Primary Accession P46736

Other Accession NM 024332, NP 077308

**Reactivity**Human, Mouse, Rat, Rabbit, Zebrafish, Pig, Guinea Pig, Horse, Bovine **Predicted**Human, Mouse, Rat, Rabbit, Pig, Chicken, Guinea Pig, Horse, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 36072

## **Additional Information**

**Gene ID** 79184

**Alias Symbol** BRCC36, C6.1A, CXorf53, RP11-143H17.2

Other Names Lys-63-specific deubiquitinase BRCC36, 3.4.19.-, BRCA1-A complex subunit

BRCC36, BRCA1/BRCA2-containing complex subunit 3,

BRCA1/BRCA2-containing complex subunit 36, BRISC complex subunit

BRCC36, BRCC3, BRCC36, C6.1A, CXorf53

Format Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium

azide and 2% sucrose.

**Reconstitution & Storage** Add 50 ul of distilled water. Final anti-BRCC3 antibody concentration is 1

mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at

20°C. Avoid repeat freeze-thaw cycles.

**Precautions** BRCC3 antibody - C-terminal region is for research use only and not for use in

diagnostic or therapeutic procedures.

## **Protein Information**

Name BRCC3

**Synonyms** BRCC36, C6.1A, CXorf53

**Function** Metalloprotease that specifically cleaves 'Lys-63'-linked polyubiquitin chains

(PubMed:<u>19214193</u>, PubMed:<u>20656690</u>, PubMed:<u>24075985</u>, PubMed:<u>26344097</u>). Does not have activity toward 'Lys- 48'-linked polyubiquitin chains (PubMed:<u>19214193</u>, PubMed:<u>20656690</u>,

PubMed: <u>24075985</u>, PubMed: <u>26344097</u>). Component of the BRCA1-A complex, a complex that specifically recognizes 'Lys-63'-linked ubiquitinated histones

H2A and H2AX at DNA lesions sites, leading to target the BRCA1-BARD1 heterodimer to sites of DNA damage at double-strand breaks (DSBs) (PubMed: 14636569, PubMed: 16707425, PubMed: 17525341, PubMed:19202061, PubMed:19261746, PubMed:19261748, PubMed: 19261749). In the BRCA1-A complex, it specifically removes 'Lys-63'-linked ubiquitin on histones H2A and H2AX, antagonizing the RNF8-dependent ubiquitination at double-strand breaks (DSBs) (PubMed: <u>20656690</u>). Catalytic subunit of the BRISC complex, a multiprotein complex that specifically cleaves 'Lys-63'-linked ubiquitin in various substrates (PubMed: 20656690, PubMed: 24075985, PubMed: 26195665, PubMed: 26344097). Mediates the specific 'Lys-63'-specific deubiquitination associated with the COP9 signalosome complex (CSN), via the interaction of the BRISC complex with the CSN complex (PubMed: 19214193). The BRISC complex is required for normal mitotic spindle assembly and microtubule attachment to kinetochores via its role in deubiquitinating NUMA1 (PubMed:26195665). Plays a role in interferon signaling via its role in the deubiquitination of the interferon receptor IFNAR1; deubiquitination increases IFNAR1 activity by enhancing its stability and cell surface expression (PubMed:24075985, PubMed:26344097). Acts as a regulator of the NLRP3 inflammasome by mediating deubiquitination of NLRP3, leading to NLRP3 inflammasome assembly (By similarity). Down- regulates the response to bacterial lipopolysaccharide (LPS) via its role in IFNAR1 deubiquitination (PubMed:24075985). Deubiquitinates HDAC1 and PWWP2B leading to their stabilization (By similarity).

#### **Cellular Location**

Nucleus. Cytoplasm. Cytoplasm, cytoskeleton, spindle pole Note=Localizes at sites of DNA damage at double-strand breaks (DSBs) (PubMed:20656690, PubMed:26344097). Interaction with ABRAXAS2 retains BRCC3 in the cytoplasm (PubMed:20656690).

#### **Tissue Location**

Heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas. Aberrantly expressed in the vast majority of breast tumors.
