

CD6 antibody - C-terminal region

Rabbit Polyclonal Antibody

Catalog # AI14946

Product Information

Application	WB
Primary Accession	P30203
Other Accession	NM_006725 , NP_006716
Reactivity	Human, Rat, Rabbit, Dog, Bovine
Predicted	Human, Rabbit, Dog, Bovine
Host	Rabbit
Clonality	Polyclonal
Calculated MW	71801

Additional Information

Gene ID	923
Alias Symbol	FLJ44171, TP120
Other Names	T-cell differentiation antigen CD6, T12, TP120, CD6, CD6
Format	Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.
Reconstitution & Storage	Add 50 ul of distilled water. Final anti-CD6 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.
Precautions	CD6 antibody - C-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	CD6 (HGNC:1691)
Function	Cell adhesion molecule that mediates cell-cell contacts and regulates T-cell responses via its interaction with ALCAM/CD166 (PubMed: 15048703 , PubMed: 15294938 , PubMed: 16352806 , PubMed: 16914752 , PubMed: 24584089 , PubMed: 24945728). Contributes to signaling cascades triggered by activation of the TCR/CD3 complex (PubMed: 24584089). Functions as a costimulatory molecule; promotes T-cell activation and proliferation (PubMed: 15294938 , PubMed: 16352806 , PubMed: 16914752). Contributes to the formation and maturation of the immunological synapse (PubMed: 15294938 , PubMed: 16352806). Functions as a calcium- dependent pattern receptor that binds and aggregates both Gram-positive and Gram-negative bacteria. Binds both lipopolysaccharide (LPS) from

Gram-negative bacteria and lipoteichoic acid from Gram-positive bacteria (PubMed:[17601777](#)). LPS binding leads to the activation of signaling cascades and down-stream MAP kinases (PubMed:[17601777](#)). Mediates activation of the inflammatory response and the secretion of pro-inflammatory cytokines in response to LPS (PubMed:[17601777](#)).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Detected at the immunological synapse, i.e, at the contact zone between antigen-presenting dendritic cells and T-cells (PubMed:15294938, PubMed:16352806). Colocalizes with the TCR/CD3 complex at the immunological synapse (PubMed:15294938)

Tissue Location

Detected on thymocytes (PubMed:15294938). Detected on peripheral blood T-cells (PubMed:15048703, PubMed:16352806) Detected on natural killer (NK) cells (PubMed:16352806). Soluble CD6 is detected in blood serum (at protein level) (PubMed:17601777). Detected in spleen, thymus, appendix, lymph node and peripheral blood leukocytes (PubMed:9013954). Expressed by thymocytes, mature T-cells, a subset of B-cells known as B-1 cells, and by some cells in the brain
