Protein Information

Name BZW2

Synonyms 5MP1 {ECO:0000303 | PubMed:21745818}

Function Translation initiation regulator which represses non-AUG initiated

translation and repeat-associated non-AUG (RAN) initiated translation by acting as a competitive inhibitor of eukaryotic translation initiation factor 5 (EIF5) function (PubMed:21745818, PubMed:28981728, PubMed:29470543, PubMed:34260931). Increases the accuracy of translation initiation by impeding EIF5-dependent translation from non-AUG codons by competing with it for interaction with EIF2S2 within the 43S pre-initiation complex (PIC)

in an EIF3C- binding dependent manner (PubMed: 21745818,

PubMed: 28981728, PubMed: 34260931).
