

# Anti-PPP2R5A Antibody (aa473-486)

Goat Anti Human Polyclonal Antibody

Catalog # ALS17858

## Product Information

---

|                              |                        |
|------------------------------|------------------------|
| <b>Application</b>           | WB, IHC-P, E           |
| <b>Primary Accession</b>     | <a href="#">Q15172</a> |
| <b>Predicted</b>             | Human, Rabbit          |
| <b>Host</b>                  | Goat                   |
| <b>Clonality</b>             | Polyclonal             |
| <b>Calculated MW</b>         | 56194                  |
| <b>Concentration (mg/ml)</b> | 0.5 mg/ml              |

## Additional Information

---

|                                     |                                                                                                                     |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>Gene ID</b>                      | 5525                                                                                                                |
| <b>Alias Symbol</b>                 | PPP2R5A                                                                                                             |
| <b>Other Names</b>                  | PPP2R5A, B56A, PP2A B subunit isoform B-alpha, PR61A, PR61alpha                                                     |
| <b>Target/Specificity</b>           | Human PPP2R5A.                                                                                                      |
| <b>Reconstitution &amp; Storage</b> | Immunoaffinity purified                                                                                             |
| <b>Precautions</b>                  | Anti-PPP2R5A Antibody (aa473-486) is for research use only and not for use in diagnostic or therapeutic procedures. |

## Protein Information

---

|                          |                                                                                                                                                                                                             |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Name</b>              | PPP2R5A                                                                                                                                                                                                     |
| <b>Function</b>          | The B regulatory subunit might modulate substrate selectivity and catalytic activity, and might also direct the localization of the catalytic enzyme to a particular subcellular compartment.               |
| <b>Cellular Location</b> | Cytoplasm. Nucleus. Chromosome, centromere. Note=From mitotic prophase to metaphase, localizes at the inner centromere between a pair of sister kinetochores. Decreased expression at the onset of anaphase |
| <b>Tissue Location</b>   | Widely expressed with the highest expression in heart and skeletal muscle                                                                                                                                   |

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
