

# Anti-ANKK1 Antibody (aa482-496)

Goat Anti Human Polyclonal Antibody

Catalog # ALS17864

## Product Information

---

|                              |                        |
|------------------------------|------------------------|
| <b>Application</b>           | WB, IHC-P, E           |
| <b>Primary Accession</b>     | <a href="#">Q8NFD2</a> |
| <b>Predicted</b>             | Human, Horse           |
| <b>Host</b>                  | Goat                   |
| <b>Clonality</b>             | Polyclonal             |
| <b>Calculated MW</b>         | 84632                  |
| <b>Concentration (mg/ml)</b> | 0.5 mg/ml              |

## Additional Information

---

|                                     |                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Gene ID</b>                      | 255239                                                                                                            |
| <b>Alias Symbol</b>                 | ANKK1                                                                                                             |
| <b>Other Names</b>                  | ANKK1, PKK2, Protein kinase PKK2, Sugen kinase 288, Sgk288, X-kinase                                              |
| <b>Target/Specificity</b>           | Human ANKK1.                                                                                                      |
| <b>Reconstitution &amp; Storage</b> | Immunoaffinity purified                                                                                           |
| <b>Precautions</b>                  | Anti-ANKK1 Antibody (aa482-496) is for research use only and not for use in diagnostic or therapeutic procedures. |

## Protein Information

---

|                        |                                                                             |
|------------------------|-----------------------------------------------------------------------------|
| <b>Name</b>            | ANKK1                                                                       |
| <b>Synonyms</b>        | PKK2, SGK288                                                                |
| <b>Tissue Location</b> | Highly expressed in brain and weakly expressed in placenta and spinal cord. |

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
