

Anti-CASP8 / Caspase 8 Antibody (aa313-362)

Rabbit Anti Human Polyclonal Antibody

Catalog # ALS18066

Product Information

Application	WB, IHC-P, E
Primary Accession	Q14790
Predicted	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	55391

Additional Information

Gene ID	841
Alias Symbol	CASP8
Other Names	CASP8, ALPS2B, Apoptotic protease Mch-5, Apoptotic cysteine protease, Casp-8, Caspase-8, CAP4, Caspase 8, MACH, MCH5, MORT1-associated ced-3 homolog, ICE-like apoptotic protease 5, Pro Caspase 8, FADD-like ICE, FLICE, MACH-alpha-1/2/3 protein, MACH-b ...
Target/Specificity	Caspase 8 Antibody detects endogenous levels of total Caspase 8 protein.
Reconstitution & Storage	Immunoaffinity purified
Precautions	Anti-CASP8 / Caspase 8 Antibody (aa313-362) is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	CASP8 {ECO:0000303 PubMed:9931493, ECO:0000312 HGNC:HGNC:1509}
Function	Thiol protease that plays a key role in programmed cell death by acting as a molecular switch for apoptosis, necroptosis and pyroptosis, and is required to prevent tissue damage during embryonic development and adulthood (PubMed: 23516580 , PubMed: 35338844 , PubMed: 35446120 , PubMed: 8681376 , PubMed: 8681377 , PubMed: 8962078 , PubMed: 9006941 , PubMed: 9184224). Initiator protease that induces extrinsic apoptosis by mediating cleavage and activation of effector caspases responsible for FAS/CD95-mediated and TNFRSF1A-induced cell death (PubMed: 23516580 , PubMed: 35338844 , PubMed: 35446120 , PubMed: 8681376 , PubMed: 8681377 , PubMed: 8962078 , PubMed: 9006941 , PubMed: 9184224). Cleaves and activates effector caspases CASP3, CASP4, CASP6, CASP7, CASP9 and CASP10 (PubMed: 16916640 , PubMed: 8962078 , PubMed: 9006941). Binding to the

adapter molecule FADD recruits it to either receptor FAS/TNFRSF6 or TNFRSF1A (PubMed:[8681376](#), PubMed:[8681377](#)). The resulting aggregate called the death-inducing signaling complex (DISC) performs CASP8 proteolytic activation (PubMed:[9184224](#)). The active dimeric enzyme is then liberated from the DISC and free to activate downstream apoptotic proteases (PubMed:[9184224](#)). Proteolytic fragments of the N-terminal propeptide (termed CAP3, CAP5 and CAP6) are likely retained in the DISC (PubMed:[9184224](#)). Also cleaves and activates BID, thereby promoting cytochrome C release from mitochondria (By similarity). In addition to extrinsic apoptosis, also acts as a negative regulator of necroptosis: acts by cleaving RIPK1 at 'Asp-324', which is crucial to inhibit RIPK1 kinase activity, limiting TNF-induced apoptosis, necroptosis and inflammatory response (PubMed:[31827280](#), PubMed:[31827281](#)). Also able to initiate pyroptosis by mediating cleavage and activation of gasdermin-C and -D (GSDMC and GSDMD, respectively): gasdermin cleavage promotes release of the N-terminal moiety that binds to membranes and forms pores, triggering pyroptosis (PubMed:[32929201](#), PubMed:[34012073](#)). Initiates pyroptosis following inactivation of MAP3K7/TAK1 (By similarity). Also acts as a regulator of innate immunity by mediating cleavage and inactivation of N4BP1 downstream of TLR3 or TLR4, thereby promoting cytokine production (By similarity). May participate in the Granzyme B (GZMB) cell death pathways (PubMed:[8755496](#)). Cleaves PARP1 and PARP2 (PubMed:[8681376](#)). Independent of its protease activity, promotes cell migration following phosphorylation at Tyr-380 (PubMed:[18216014](#), PubMed:[27109099](#)).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q9JHX4}. Nucleus {ECO:0000250|UniProtKB:Q9JHX4}. Cell projection, lamellipodium. Note=Recruitment to lamellipodia of migrating cells is enhanced by phosphorylation at Tyr-380

Tissue Location

Isoform 1, isoform 5 and isoform 7 are expressed in a wide variety of tissues. Highest expression in peripheral blood leukocytes, spleen, thymus and liver. Barely detectable in brain, testis and skeletal muscle

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
