

# Cardiac FABP Antibody(Ascites)

Mouse Monoclonal Antibody (Mab) Catalog # AM2000a

#### **Product Information**

Application WB, E
Primary Accession P05413
Other Accession NP\_004093.1
Reactivity Mouse
Host Mouse
Clonality Monoclonal
Isotype IgG1

**Clone Names** 388CT12.2.4.1

Calculated MW 14858

#### **Additional Information**

**Gene ID** 2170

Other Names Fatty acid-binding protein, heart, Fatty acid-binding protein 3, Heart-type fatty

acid-binding protein, H-FABP, Mammary-derived growth inhibitor, MDGI,

Muscle fatty acid-binding protein, M-FABP, FABP3, FABP11, MDGI

Target/Specificity Purified His-tagged Cardiac FABP protein(Fragment) was used to produced

this monoclonal antibody.

**Dilution** WB~~1:1000~4000 E~~Use at an assay dependent concentration.

Format Mouse monoclonal antibody supplied in crude ascites with 0.09% (W/V)

sodium azide.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions** Cardiac FABP Antibody(Ascites) is for research use only and not for use in

diagnostic or therapeutic procedures.

#### **Protein Information**

Name FABP3

Synonyms FABP11, MDGI

**Function** FABPs are thought to play a role in the intracellular transport of long-chain

fatty acids and their acyl-CoA esters.

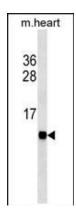

## **Background**

The intracellular fatty acid-binding proteins (FABPs) belongs to a multigene family. FABPs are divided into at least three distinct types, namely the hepatic-, intestinal- and cardiac-type. They form 14-15 kDa proteins and are thought to participate in the uptake, intracellular metabolism and/or transport of long-chain fatty acids. They may also be responsible in the modulation of cell growth and proliferation. Fatty acid-binding protein 3 gene contains four exons and its function is to arrest growth of mammary epithelial cells. This gene is a candidate tumor suppressor gene for human breast cancer. [provided by RefSeq].
