

# KRT19 Antibody

Purified Mouse Monoclonal Antibody (Mab)

Catalog # AM8477b

## Product Information

---

|                          |                        |
|--------------------------|------------------------|
| <b>Application</b>       | WB, IHC-P, IF, E       |
| <b>Primary Accession</b> | <a href="#">P08727</a> |
| <b>Reactivity</b>        | Human                  |
| <b>Host</b>              | Mouse                  |
| <b>Clonality</b>         | monoclonal             |
| <b>Isotype</b>           | IgG1,k                 |
| <b>Clone Names</b>       | 979CT14.3.1            |
| <b>Calculated MW</b>     | 44106                  |

## Additional Information

---

|                           |   |
|---------------------------|---|
| <b>Gene ID</b>            | 3880  |
| <b>Other Names</b>        | Keratin, type I cytoskeletal 19, Cytokeratin-19, CK-19, Keratin-19, K19, KRT19  |
| <b>Target/Specificity</b> | This antibody is generated from a mouse immunized with a recombinant protein of human.  |
| <b>Dilution</b>           | WB~~1:4000 IHC-P~~1:100~500 IF~~1:25 E~~Use at an assay dependent concentration.  |
| <b>Format</b>             | Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS. |
| <b>Storage</b>            | Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.                             |
| <b>Precautions</b>        | KRT19 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.  |

## Protein Information

---

|                        |  |
|------------------------|--|
| <b>Name</b>            | KRT19  |
| <b>Function</b>        | Involved in the organization of myofibers. Together with KRT8, helps to link the contractile apparatus to dystrophin at the costameres of striated muscle.   |
| <b>Tissue Location</b> | Expressed in a defined zone of basal keratinocytes in the deep outer root sheath of hair follicles. Also observed in sweat gland and mammary gland ductal and secretory cells, bile ducts, gastrointestinal tract, bladder |

urothelium, oral epithelia, esophagus, ectocervical epithelium (at protein level). Expressed in epidermal basal cells, in nipple epidermis and a defined region of the hair follicle. Also seen in a subset of vascular wall cells in both the veins and artery of human umbilical cord, and in umbilical cord vascular smooth muscle. Observed in muscle fibers accumulating in the costameres of myoplasm at the sarcolemma in structures that contain dystrophin and spectrin.

## Background

---

Involved in the organization of myofibers. Together with KRT8, helps to link the contractile apparatus to dystrophin at the costameres of striated muscle.
