

# CD81 Antibody

Purified Mouse Monoclonal Antibody (Mab) Catalog # AM8567b

### **Product Information**

Application WB, E
Primary Accession P60033
Other Accession P60034
Reactivity Human, Rat
Host Mouse
Clonality monoclonal
Isotype IgG1,k

**Clone Names** 1668CT178.9.24.87

Calculated MW 25809

## **Additional Information**

Gene ID 975

Other Names CD81 antigen, 26 kDa cell surface protein TAPA-1, Target of the

antiproliferative antibody 1, Tetraspanin-28, Tspan-28, CD81, CD81, TAPA1,

TSPAN28

**Target/Specificity** This CD81 antibody is generated from a mouse immunized with a

recombinant protein between 113-204 amino acids from the human CD81.

**Dilution** WB~~1:4000 E~~Use at an assay dependent concentration.

**Format** Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein G column, followed by dialysis

against PBS.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions** CD81 Antibody is for research use only and not for use in diagnostic or

therapeutic procedures.

### **Protein Information**

Name CD81 {ECO:0000303 | PubMed:8766544, ECO:0000312 | HGNC:HGNC:1701}

**Function** Structural component of specialized membrane microdomains known as

tetraspanin-enriched microdomains (TERMs), which act as platforms for

receptor clustering and signaling. Essential for trafficking and

compartmentalization of CD19 receptor on the surface of activated B cells

(PubMed: 16449649, PubMed: 20237408, PubMed: 27881302). Upon initial encounter with microbial pathogens, enables the assembly of CD19-CR2/CD21 and B cell receptor (BCR) complexes at signaling TERMs, lowering the threshold dose of antigen required to trigger B cell clonal expansion and antibody production (PubMed:15161911, PubMed:20237408). In T cells, facilitates the localization of CD247/CD3 zeta at antigen-induced synapses with B cells, providing for costimulation and polarization toward T helper type 2 phenotype (PubMed:<u>22307619</u>, PubMed:<u>23858057</u>, PubMed:<u>8766544</u>). Present in MHC class II compartments, may also play a role in antigen presentation (PubMed:8409388, PubMed:8766544). Can act both as positive and negative regulator of homotypic or heterotypic cell-cell fusion processes. Positively regulates sperm-egg fusion and may be involved in acrosome reaction (By similarity). In myoblasts, associates with CD9 and PTGFRN and inhibits myotube fusion during muscle regeneration (By similarity). In macrophages, associates with CD9 and beta-1 and beta-2 integrins, and prevents macrophage fusion into multinucleated giant cells specialized in ingesting complement-opsonized large particles (PubMed:12796480). Also prevents the fusion of mononuclear cell progenitors into osteoclasts in charge of bone resorption (By similarity). May regulate the compartmentalization of enzymatic activities. In T cells, defines the subcellular localization of dNTPase SAMHD1 and permits its degradation by the proteasome, thereby controlling intracellular dNTP levels (PubMed:28871089). Also involved in cell adhesion and motility. Positively regulates integrin-mediated adhesion of macrophages, particularly relevant for the inflammatory response in the lung (By similarity).

#### **Cellular Location**

Cell membrane; Multi-pass membrane protein. Basolateral cell membrane; Multi-pass membrane protein. Note=Associates with CLDN1 and the CLDN1-CD81 complex localizes to the basolateral cell membrane

#### **Tissue Location**

Expressed on B cells (at protein level) (PubMed:20237408). Expressed in hepatocytes (at protein level) (PubMed:12483205). Expressed in monocytes/macrophages (at protein level) (PubMed:12796480). Expressed on both naive and memory CD4- positive T cells (at protein level) (PubMed:22307619)

# **Background**

May play an important role in the regulation of lymphoma cell growth. Interacts with a 16-kDa Leu-13 protein to form a complex possibly involved in signal transduction. May act as the viral receptor for HCV.
