

Anti-Tyrosine Hydroxylase Antibody

Our Anti-Tyrosine Hydroxylase sheep polyclonal primary antibody from PhosphoSolutions is produced in Catalog # AN1598

Product Information

Application WB, IHC, ICC
Primary Accession P04177
Host Sheep
Clonality Polyclonal
Isotype IgG
Calculated MW 55966

Additional Information

Gene ID 25085

Other Names Dystonia 14 antibody, DYT14 antibody, DYT5b antibody, EC 1.14.16.2

antibody, OTTHUMP00000011225 antibody, OTTHUMP00000011226 antibody, ple antibody, Protein Pale antibody, TH antibody, The antibody, TY3H_HUMAN

antibody, TYH antibody, Tyrosine 3 hydroxylase antibody, Tyrosine 3 monooxygenase antibody, Tyrosine 3-hydroxylase antibody, Tyrosine

3-monooxygenase antibody, Tyrosine hydroxylase antibody

Target/SpecificityTyrosine hydroxylase (TH) is the rate-limiting enzyme in the synthesis of the

catecholamines dopamine and norepinephrine. TH antibodies can therefore be used as markers for dopaminergic and noradrenergic neurons in a variety of applications including depression, schizophrenia, Parkinson's disease and drug abuse (Kish et al., 2001; Zhu et al., 2000; Zhu et al., 1999). TH antibodies

can also be used to explore basic mechanisms of dopamine and

norepinephrine signaling (Witkovsky et al., 2000; Salvatore et al., 2001).

Dilution WB~~1:1000 IHC~~1:100~500 ICC~~N/A

Format Antigen Affinity Purified from Pooled Serum

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions Anti-Tyrosine Hydroxylase Antibody is for research use only and not for use in

diagnostic or therapeutic procedures.

Shipping Blue Ice

Background

Tyrosine hydroxylase (TH) is the rate-limiting enzyme in the synthesis of the catecholamines dopamine and norepinephrine. TH antibodies can therefore be used as markers for dopaminergic and noradrenergic

neurons in a variety of applications including depression, schizophrenia, Parkinson's disease and drug abuse (Kish et al., 2001; Zhu et al., 2000; Zhu et al., 1999). TH antibodies can also be used to explore basic mechanisms of dopamine and norepinephrine signaling (Witkovsky et al., 2000; Salvatore et al., 2001).

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
