

# Anti-Visinin-Like Protein 1 (VSNL1) Antibody

Our Anti-Visinin-Like Protein 1 (VSNL1) mouse monoclonal primary antibody from PhosphoSolutions is p  
Catalog # AN1608

## Product Information

<b>Application</b>	WB, IHC, ICC
<b>Primary Accession</b>	<a href="#">P62760</a>
<b>Host</b>	Mouse
<b>Clonality</b>	Monoclonal
<b>Isotype</b>	IgG1
<b>Clone Names</b>	2D11
<b>Calculated MW</b>	22142

## Additional Information

<b>Gene ID</b>	7447
<b>Other Names</b>	21 kDa CABP antibody, Hippocalcin like protein 3 antibody, Hippocalcin-like protein 3 antibody, HLP 3 antibody, HLP3 antibody, HPCAL 3 antibody, HPCAL3 antibody, HUVISL1 antibody, Neural visinin-like protein 1 antibody, Neural visinin-like type 1 protein antibody, Neurocalcin alpha antibody, NVL 1 antibody, NVL1 antibody, Nvp1 antibody, OZ1 antibody, Ratnvp1 antibody, VILIP antibody, VILIP1 antibody, VILIP-1 antibody, Visinin antibody, Visinin like 1 antibody, Visinin like protein 1 antibody, Visinin-like protein 1 antibody, VISL 1 antibody, VISL1 antibody, VISL1_HUMAN antibody, VLP-1 antibody, Vnsl1 antibody, Vsnl1 antibody
<b>Target/Specificity</b>	Visinin-like protein 1 (VSNL1), also known as VILIP1, is a calcium sensor protein expressed exclusively in neurons. Highest levels of VSNL1 expression are found in cerebellar Purkinje cells. VSNL1 has been implicated in the modulation of cell signaling cascades via regulation of adenylyl cyclase activity (Braunewell et al., 1997). Additionally, VSNL1 has been associated with amyloid plaques and neurofibrillar tangles in Alzheimer's disease (Schnurra et al., 2001).
<b>Dilution</b>	WB~~1:1000 IHC~~1:100~500 ICC~~N/A
<b>Format</b>	Protein G Purified
<b>Storage</b>	Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
<b>Precautions</b>	Anti-Visinin-Like Protein 1 (VSNL1) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.
<b>Shipping</b>	Blue Ice

## Background

---

Visinin-like protein 1 (VSNL1), also known as VILIP1, is a calcium sensor protein expressed exclusively in neurons. Highest levels of VSNL1 expression are found in cerebellar Purkinje cells. VSNL1 has been implicated in the modulation of cell signaling cascades via regulation of adenylyl cyclase activity (Braunewell et al., 1997). Additionally, VSNL1 has been associated with amyloid plaques and neurofibrillar tangles in Alzheimer's disease (Schnurra et al., 2001).
