

Anti-Paxillin (C-terminal) Antibody

Catalog # AN1886

Product Information

Application WB
Primary Accession P49023
Rabbit

Clonality Rabbit Polyclonal

Isotype IgG **Calculated MW** 64505

Additional Information

Gene ID 5829

Other Names Paxillin, PXN

Dilution WB~~1:1000

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions Anti-Paxillin (C-terminal) Antibody is for research use only and not for use in

diagnostic or therapeutic procedures.

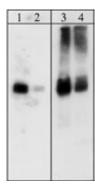

Shipping Blue Ice

Background

Paxillin, a focal adhesion protein, is involved in focal adhesion formation during cell adhesion and migration. Paxillin contains LD motifs, LIM domains, and SH3-/SH2-binding domains that participate in a variety of protein-protein interactions with kinases, GTPase-activating proteins, and cytoskeletal proteins. Phosphorylation of paxillin occurs at both tyrosine and serine sites. Serine phosphorylation of paxillin occurs in response to growth-factor activation and fibronectins. Both JNK1 and cdc2 kinases can phosphorylate serine 178 in paxillin. The mutant form of paxillin (S178A) decreases the migration of keratocytes and epithelial cells. Thus, phosphorylation paxillin at serine 178 may be important during cell migration

Images

Western blot analysis of A431 cells. The blot was probed with rabbit polyclonal anti-Paxillin (AN1886) at 1:500 & 1:2000 (lanes 1 & 2) or with mouse monoclonal anti-Paxillin (PM1071) at 1:2000 & 1:5000 (lanes 3 & 4).

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
