

Anti-ZNRF2 Antibody

Catalog # AN2153

Product Information

ApplicationWBPrimary AccessionQ8NHG8HostRabbit

Clonality Rabbit Polyclonal

Isotype IgG **Calculated MW** 24115

Additional Information

Gene ID 223082

Other Names E3 ubiquitin-protein ligase ZNRF2, Protein Ells2, RING finger protein 202,

Zinc/RING finger protein 2, RING-type E3 ubiquitin transferase

Dilution WB~~1:1000

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions Anti-ZNRF2 Antibody is for research use only and not for use in diagnostic or

therapeutic procedures.

Shipping Blue Ice

Background

Protein ubiquitination has been implicated recently in neural development, plasticity, and degeneration. ZNRF1/nin283, is a protein with a unique, evolutionarily conserved C-terminal domain containing a juxtaposed zinc finger/RING finger combination. ZNRF2, is another novel member of the family of ZNRF E3 ubiquitin ligases. Both ZNRF1 and ZNRF2 have E3 ubiquitin ligase activity and are highly expressed in the nervous system, particularly during development. In neurons, ZNRF proteins are located in different compartments within the presynaptic terminal: ZNRF1 is associated with synaptic vesicle membranes, whereas ZNRF2 is present in presynaptic plasma membranes. Data suggest that ZNRF proteins play a role in the establishment and maintenance of neuronal transmission and plasticity via their ubiquitin ligase activity.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
