

ALCAM Antibody

Purified Mouse Monoclonal Antibody Catalog # AO1180a

Product Information

Application WB, E **Primary Accession** Q13740 Reactivity Human Host Mouse Clonality Monoclonal **Clone Names** 3F8B12 Isotype IgG2a 65102 **Calculated MW**

Description ALCAM(CD166): Activated leukocyte cell adhesion molecule.CD166 is a

member of the Ig superfamily and is expressed on activated T-cells, B cells and other cells including thymic epithelial cells, fibroblasts, keratinocytes and

neurons. CD6 has been identified as a receptor for CD166.

Immunogen Purified recombinant fragment of ALCAM (aa405-524) expressed in E. Coli.

Formulation Ascitic fluid containing 0.03% sodium azide.

Additional Information

Gene ID 214

Other Names CD166 antigen, Activated leukocyte cell adhesion molecule, CD166, ALCAM,

MEMD

Dilution WB~~1/500 - 1/2000 E~~N/A

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions ALCAM Antibody is for research use only and not for use in diagnostic or

therapeutic procedures.

Protein Information

Name ALCAM

Synonyms MEMD {ECO:0000303 | PubMed:9502422}

Function Cell adhesion molecule that mediates both heterotypic cell- cell contacts via

its interaction with CD6, as well as homotypic cell- cell contacts

(PubMed: 15048703, PubMed: 15496415, PubMed: 16352806, PubMed:<u>23169771</u>, PubMed:<u>24945728</u>, PubMed:<u>7760007</u>). Promotes T-cell activation and proliferation via its interactions with CD6 (PubMed: 15048703, PubMed: 16352806, PubMed: 24945728). Contributes to the formation and maturation of the immunological synapse via its interactions with CD6 (PubMed:15294938, PubMed:16352806). Mediates homotypic interactions with cells that express ALCAM (PubMed:15496415, PubMed:16352806). Acts as a ligand for the LILRB4 receptor, enhancing LILRB4-mediated inhibition of T cell proliferation (PubMed: <u>29263213</u>). Required for normal hematopoietic stem cell engraftment in the bone marrow (PubMed:24740813). Mediates attachment of dendritic cells onto endothelial cells via homotypic interaction (PubMed:23169771). Inhibits endothelial cell migration and promotes endothelial tube formation via homotypic interactions (PubMed: 15496415, PubMed:23169771). Required for normal organization of the lymph vessel network. Required for normal hematopoietic stem cell engraftment in the bone marrow. Plays a role in hematopoiesis; required for normal numbers of hematopoietic stem cells in bone marrow. Promotes in vitro osteoblast proliferation and differentiation (By similarity). Promotes neurite extension, axon growth and axon guidance; axons grow preferentially on surfaces that contain ALCAM. Mediates outgrowth and pathfinding for retinal ganglion cell axons (By similarity).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Cell projection, axon {ECO:0000250 | UniProtKB:Q61490}. Cell projection, dendrite {ECO:0000250 | UniProtKB:Q61490}. Note=Detected at the immunological synapse, i.e, at the contact zone between antigen-presenting dendritic cells and T-cells (PubMed:15294938, PubMed:16352806). Colocalizes with CD6 and the TCR/CD3 complex at the immunological synapse (PubMed:15294938).

Tissue Location

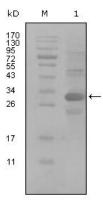

Detected on hematopoietic stem cells derived from umbilical cord blood (PubMed:24740813). Detected on lymph vessel endothelial cells, skin and tonsil (PubMed:23169771). Detected on peripheral blood monocytes (PubMed:15048703). Detected on monocyte- derived dendritic cells (at protein level) (PubMed:16352806). Detected at low levels in spleen, placenta, liver (PubMed:9502422). Expressed by activated T-cells, B-cells, monocytes and thymic epithelial cells (PubMed:7760007). Isoform 1 and isoform 3 are detected in vein and artery endothelial cells, astrocytes, keratinocytes and artery smooth muscle cells (PubMed:15496415). Expressed by neurons in the brain Restricted expression in tumor cell lines. Detected in highly metastasizing melanoma cell lines (PubMed:9502422)
