

# CSNK2B Antibody

Purified Mouse Monoclonal Antibody Catalog # AO1961a

## **Product Information**

| Application<br>Primary Accession<br>Reactivity<br>Host<br>Clonality<br>Clone Names<br>Isotype<br>Calculated MW<br>Description | WB, IHC, FC, ICC, E<br>P67870<br>Human<br>Mouse<br>Monoclonal<br>2F12F3<br>IgG1<br>24942<br>This gene encodes the beta subunit of casein kinase II, a ubiquitous protein<br>kinase which regulates metabolic pathways, signal transduction, transcription,<br>translation, and replication. The enzyme is composed of three subunits,<br>alpha, alpha prime and beta, which form a tetrameric holoenzyme. The alpha<br>and alpha prime subunits are catalytic, while the beta subunit serves<br>regulatory functions. The enzyme localizes to the endoplasmic reticulum and<br>the Golgi apparatus. Two transcript variants encoding different isoforms have<br>been found for this gene. |
|---|---|
| Immunogen   | Purified recombinant fragment of human CSNK2B (AA: FULL(1-215))<br>expressed in E. Coli.  |
| Formulation   | Purified antibody in PBS with 0.05% sodium azide.   |

# **Additional Information**

| Gene ID     | 1460   |
|-------------|--|
| Other Names | Casein kinase II subunit beta, CK II beta, Phosvitin, Protein G5a, CSNK2B,<br>CK2N, G5A  |
| Dilution    | WB~~1/500 - 1/2000 IHC~~1/200 - 1/1000 FC~~1/200 - 1/400 ICC~~N/A<br>E~~1/10000  |
| Storage     | Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles. |
| Precautions | CSNK2B Antibody is for research use only and not for use in diagnostic or therapeutic procedures.  |

# **Protein Information**

| Name              | CSNK2B ( <u>HGNC:2460</u> )   |
|-------------------|---|
| Synonyms          | CK2N, G5A   |
| Function          | Regulatory subunit of casein kinase II/CK2. As part of the kinase complex regulates the basal catalytic activity of the alpha subunit a constitutively active serine/threonine-protein kinase that phosphorylates a large number of substrates containing acidic residues C-terminal to the phosphorylated serine or threonine (PubMed: <u>11239457</u> , PubMed: <u>16818610</u> ). Participates in Wnt signaling (By similarity). |
| Cellular Location | Nucleus.  |

## Background

PIWIL4 belongs to the Argonaute family of proteins, which function in development and maintenance of germline stem cells ; ; ;
