

Mouse Monoclonal Antibody to CALB2

Purified Mouse Monoclonal Antibody Catalog # AO2402a

Product Information

Application WB, FC, E **Primary Accession** P22676

Reactivity Human, Monkey

Host Mouse
Clonality Monoclonal
Clone Names 7H1G3
Isotype Mouse IgG1
Calculated MW 31540

Description This gene encodes an intracellular calcium-binding protein belonging to the

troponin C superfamily. Members of this protein family have six EF-hand domains which bind calcium. This protein plays a role in diverse cellular functions, including message targeting and intracellular calcium buffering. It also functions as a modulator of neuronal excitability, and is a diagnostic marker for some human diseases, including Hirschsprung disease and some cancers. Alternative splicing results in multiple transcript variants. This gene encodes an intracellular calcium-binding protein belonging to the troponin C superfamily. Members of this protein family have six EF-hand domains which bind calcium. This protein plays a role in diverse cellular functions, including message targeting and intracellular calcium buffering. It also functions as a modulator of neuronal excitability, and is a diagnostic marker for some human diseases, including Hirschsprung disease and some cancers.

Alternative splicing results in multiple transcript variants.;

Immunogen Purified recombinant fragment of human CALB2 (AA: 172-271) expressed in E.

Coli.

Formulation Purified antibody in PBS with 0.05% sodium azide

Application Note ELISA: 1/10000; WB: 1/500 - 1/2000; FCM: 1/200 - 1/400

Additional Information

Gene ID 794

Other Names CR; CAL2; CAB29

Dilution WB~~1:1000 FC~~1:10~50 E~~N/A

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions Mouse Monoclonal Antibody to CALB2 is for research use only and not for use

Protein Information

Name CALB2 (HGNC:1435)

Synonyms CAB29

Function Calcium-binding protein involved in calcium homeostasis and signal

transduction. It plays a critical role in buffering intracellular calcium levels and modulating calcium-dependent signaling pathways (PubMed:2001709). Predominantly expressed in specific neuronal populations, influences synaptic plasticity and neuronal excitability, contributing to learning and memory (By similarity). During embryonic development, it facilitates neuronal

differentiation and maturation (By similarity).

Cellular Location Synapse {ECO:0000250 | UniProtKB:Q08331}. Cell projection, dendrite

 $\label{lem:condition} $$\{ECO:0000250 \,|\, UniProtKB: Q08331\}. \ Note=Located \ in \ dendrioles, \ small \ and \ located \ in \ dendrioles, \ located \ in \ dend$

dendrites that makes up a brush structure found as the terminal specialization of a dendrite of a unipolar brush cell

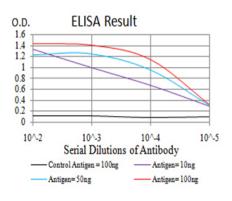

{ECO:0000250|UniProtKB:Q08331}

Tissue Location Brain.
