

BAX

Purified Mouse Monoclonal Antibody Catalog # AO2578a

Product Information

Application	WB, IHC, ICC, E
Primary Accession	Q07812
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Clone Names	4H9B11
Isotype	Mouse IgG2a
Calculated MW	21184
Immunogen	Purified recombinant fragment of human BAX (AA: 13-160) expressed in E.
Formulation	Coli. Purified antibody in PBS with 0.05% sodium azide

Additional Information

Gene ID	581
Other Names	BCL2L4
Dilution	WB~~ 1/500 - 1/2000 IHC~~1/200 - 1/1000 ICC~~N/A E~~ 1/10000
Storage	Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	BAX is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	BAX
Synonyms	BCL2L4
Function	Plays a role in the mitochondrial apoptotic process (PubMed: <u>10772918</u> , PubMed: <u>11060313</u> , PubMed: <u>16113678</u> , PubMed: <u>16199525</u> , PubMed: <u>18948948</u> , PubMed: <u>21199865</u> , PubMed: <u>21458670</u> , PubMed: <u>25609812</u> , PubMed: <u>36361894</u> , PubMed: <u>8358790</u> , PubMed: <u>8521816</u>). Under normal conditions, BAX is largely cytosolic via constant retrotranslocation from mitochondria to the cytosol mediated by BCL2L1/Bcl-xL, which avoids accumulation of toxic BAX levels at the

	mitochondrial outer membrane (MOM) (PubMed: <u>21458670</u>). Under stress conditions, undergoes a conformation change that causes translocation to the mitochondrion membrane, leading to the release of cytochrome c that then triggers apoptosis (PubMed: <u>10772918</u> , PubMed: <u>11060313</u> , PubMed: <u>16113678</u> , PubMed: <u>16199525</u> , PubMed: <u>18948948</u> , PubMed: <u>21199865</u> , PubMed: <u>21458670</u> , PubMed: <u>25609812</u> , PubMed: <u>8358790</u> , PubMed: <u>8521816</u>). Promotes activation of CASP3, and thereby apoptosis (PubMed: <u>10772918</u> , PubMed: <u>11060313</u> , PubMed: <u>16113678</u> , PubMed: <u>16199525</u> , PubMed: <u>18948948</u> , PubMed: <u>21199865</u> , PubMed: <u>21458670</u> , PubMed: <u>25609812</u> , PubMed: <u>8358790</u> , PubMed: <u>8521816</u>).
Cellular Location	[Isoform Alpha]: Mitochondrion outer membrane; Single-pass membrane protein. Cytoplasm. Nucleus Note=Colocalizes with 14-3-3 proteins in the cytoplasm. Under stress conditions, undergoes a conformation change that causes release from JNK-phosphorylated 14-3-3 proteins and translocation to the mitochondrion membrane. Upon Sendai virus infection, recruited to the mitochondrion through interaction with IRF3 (PubMed:25609812) [Isoform Gamma]: Cytoplasm.
Tissue Location	Expressed in a wide variety of tissues. Isoform Psi is found in glial tumors. Isoform Alpha is expressed in spleen, breast, ovary, testis, colon and brain, and at low levels in skin and lung Isoform Sigma is expressed in spleen, breast, ovary, testis, lung, colon, brain and at low levels in skin. Isoform Alpha and isoform Sigma are expressed in pro-myelocytic leukemia, histiocytic lymphoma, Burkitt's lymphoma, T-cell lymphoma, lymphoblastic leukemia, breast adenocarcinoma, ovary adenocarcinoma, prostate carcinoma, prostate adenocarcinoma, lung carcinoma, epidermoid carcinoma, small cell lung carcinoma and colon adenocarcinoma cell lines
