

CD119

Purified Mouse Monoclonal Antibody Catalog # AO2712a

# **Product Information**

Application	WB, IHC, ICC, E
Primary Accession	<u>P15260</u>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Clone Names	5H1C9
Isotype	Mouse IgG1
Calculated MW	54405
Immunogen	Purified recombinant fragment of human CD119 (AA: extra 18-245) expressed
Formulation	in E. Coli. Purified antibody in PBS with 0.05% sodium azide

## **Additional Information**

Gene ID	3459
Other Names	IFNGR1; IFNGR; IMD27A; IMD27B
Dilution	WB~~ 1/500 - 1/2000 IHC~~1:100~500 ICC~~N/A E~~ 1/10000
Storage	Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	CD119 is for research use only and not for use in diagnostic or therapeutic procedures.

### **Protein Information**

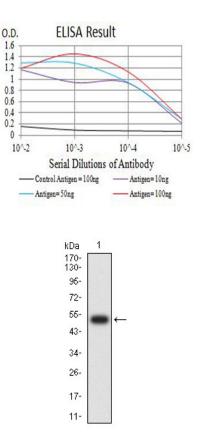

Name	IFNGR1 ( <u>HGNC:5439</u> )
Function	Receptor subunit for interferon gamma/INFG that plays crucial roles in antimicrobial, antiviral, and antitumor responses by activating effector immune cells and enhancing antigen presentation (PubMed:20015550). Associates with transmembrane accessory factor IFNGR2 to form a functional receptor (PubMed:10986460, PubMed:2971451, PubMed:7615558, PubMed:7617032, PubMed:7673114). Upon ligand binding, the intracellular domain of IFNGR1 opens out to allow association of downstream signaling components JAK1 and JAK2. In turn, activated JAK1 phosphorylates IFNGR1 to form a docking site for STAT1. Subsequent phosphorylation of STAT1 leads to

dimerization, translocation to the nucleus, and stimulation of target gene<br/>transcription (PubMed:<a>28883123</a>). STAT3 can also be activated in a similar<br/>manner although activation seems weaker. IFNGR1 intracellular domain<br/>phosphorylation also provides a docking site for SOCS1 that regulates the<br/>JAK-STAT pathway by competing with STAT1 binding to IFNGR1 (By similarity).Cellular LocationCell membrane; Single-pass type I membrane protein
