

CD191

Purified Mouse Monoclonal Antibody

Catalog # AO2724a

Product Information

Application	WB, IHC, ICC, E
Primary Accession	P32246
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Clone Names	8E10F9
Isotype	Mouse IgG1
Calculated MW	41173
Immunogen	Purified recombinant fragment of human CD191 (AA: extra mix) expressed in E. Coli.
Formulation	Purified antibody in PBS with 0.05% sodium azide

Additional Information

Gene ID	1230
Other Names	CCR1; CKR1; CKR-1; HM145; CMKBR1; MIP1aR; SCYAR1
Dilution	WB~~ 1/500 - 1/2000 IHC~~1:100~500 ICC~~N/A E~~ 1/10000
Storage	Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	CD191 is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	CCR1
Synonyms	CMKBR1, CMKR1, SCYAR1
Function	Chemokine receptor that plays a crucial role in regulating immune cell migration, inflammation, and immune responses (PubMed: 14991608). Contributes to the inflammatory response by recruiting immune cells, such as monocytes, macrophages, T-cells, and dendritic cells, to sites of inflammation for the clearance of pathogens and the resolution of tissue damage. When activated by its ligands including CCL3, CCL5-9, CCL13-16 and CCL23, triggers a signaling cascade within immune cells, leading to their migration towards

the source of the chemokine (PubMed:[15905581](#)). For example, mediates neutrophil migration after activation by CCL3 leading to the sequential release of TNF-alpha and leukotriene B4 (By similarity). Also mediates monocyte migration upon CXCL4 binding (PubMed:[29930254](#)). Activation by CCL5 results in neuroinflammation through the ERK1/2 signaling pathway (By similarity).

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location

Widely expressed in different hematopoietic cells.
