

# **CLIC6 Antibody (Center)**

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP10474c

#### **Product Information**

**Application** WB, IHC-P, FC, E

Primary Accession Q96NY7

 Other Accession
 Q811Q2, Q8BHB9, NP\_444507.1

Reactivity Human **Predicted** Mouse, Rat Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB23443 **Calculated MW** 73012 **Antigen Region** 539-565

### **Additional Information**

**Gene ID** 54102

Other Names Chloride intracellular channel protein 6, Parchorin, CLIC6, CLIC1L

**Target/Specificity** This CLIC6 antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 539-565 amino acids from the Central

region of human CLIC6.

**Dilution** WB~~1:1000 IHC-P~~1:100~500 FC~~1:10~50 E~~Use at an assay dependent

concentration.

**Format** Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions** CLIC6 Antibody (Center) is for research use only and not for use in diagnostic

or therapeutic procedures.

#### **Protein Information**

Name CLIC6 {ECO:0000303|PubMed:37838179, ECO:0000312|HGNC:HGNC:2065}

**Function** In the soluble state, catalyzes glutaredoxin-like thiol disulfide exchange

reactions with reduced glutathione as electron donor (By similarity). Can

insert into membranes and form voltage-dependent chloride-selective channels. The channel opens upon membrane depolarization at positive voltages and closes at negative membrane voltages (PubMed:37838179). May play a critical role in water-secreting cells, possibly through the regulation of chloride ion transport (By similarity).

**Cellular Location** Cytoplasm. Cell membrane; Single-pass membrane protein

Note=Predominantly cytoplasmic. Upon chloride ion efflux from the cell, it is

translocated to the plasma membrane (By similarity)

**Tissue Location** Expressed in brain, placenta, pancreas, liver, lung, heart, kidney, liver, spleen,

soleus muscle, and brown fat

## **Background**

CLIC6 is a member of the chloride intracellular channel family of proteins. The gene is part of a large triplicated region found on chromosomes 1, 6, and 21. An alternatively spliced transcript variant has been described, but its biological validity has not been determined.
