

# TUFM Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP12916b

#### **Product Information**

Application WB, E Primary Accession P49411

Other Accession <u>P85834</u>, <u>Q8BFR5</u>, <u>NP 003312.3</u>

Reactivity Human **Predicted** Mouse, Rat Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB22085 **Calculated MW** 49875 342-370 **Antigen Region** 

### **Additional Information**

**Gene ID** 7284

Other Names Elongation factor Tu, mitochondrial, EF-Tu, P43, TUFM

**Target/Specificity** This TUFM antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 342-370 amino acids from the

C-terminal region of human TUFM.

**Dilution** WB~~1:1000 E~~Use at an assay dependent concentration.

**Format** Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**TUFM Antibody (C-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

#### **Protein Information**

Name TUFM

**Function** GTP hydrolase that promotes the GTP-dependent binding of

aminoacyl-tRNA to the A-site of ribosomes during protein biosynthesis. Also plays a role in the regulation of autophagy and innate immunity. Recruits

ATG5-ATG12 and NLRX1 at mitochondria and serves as a checkpoint of the RIGI-MAVS pathway. In turn, inhibits RLR-mediated type I interferon while promoting autophagy.

**Cellular Location** 

Mitochondrion.

# **Background**

This gene encodes a protein which participates in protein translation in mitochondria. Mutations in this gene have been associated with combined oxidative phosphorylation deficiency resulting in lactic acidosis and fatal encephalopathy. A pseudogene has been identified on chromosome 17.
