

MMP28 Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP13734c

Product Information

Application WB, IHC-P, E Primary Accession Q9H239

Other Accession NP 001027449.1, NP 077278.1

Reactivity Human
Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Clone Names RB33715
Calculated MW 58939
Antigen Region 195-223

Additional Information

Gene ID 79148

Other Names Matrix metalloproteinase-28, MMP-28, 3424-, Epilysin, MMP28, MMP25

Target/Specificity This MMP28 antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 195-223 amino acids from the Central

region of human MMP28.

Dilution WB~~1:1000 IHC-P~~1:100~500 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions MMP28 Antibody (Center) is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name MMP28

Synonyms MMP25

Function Can degrade casein. Could play a role in tissues homeostasis and repair.

Cellular Location

Secreted, extracellular space, extracellular matrix

Tissue Location

Expressed at high levels in testes and lung. Low levels are detected in kidney, pancreas and skin. Also expressed in fetal lung, brain, skeletal muscle and kidney. Expressed selectively in keratinocytes. Widely expressed in several carcinomas as well. Is up- regulated in response to injury in the skin

Background

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix for both normal physiological processes, such as embryonic development, reproduction and tissue remodeling, and disease processes, such as asthma and metastasis. This gene encodes a secreted enzyme that degrades casein. Its expression pattern suggests that it plays a role in tissue homeostasis and in wound repair. Transcript variants encoding different isoforms have been described. [provided by RefSeq].
