

K Cadherin (CDH6) Antibody (N-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP1415a

Product Information

Application WB, E Primary Accession P55285

Other Accession P55280, P97326, Q3SWX5
Reactivity Human, Rat, Mouse
Predicted Bovine, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Calculated MW 88309
Antigen Region 61-89

Additional Information

Gene ID 1004

Other Names Cadherin-6, Kidney cadherin, K-cadherin, CDH6

Target/Specificity This K Cadherin (CDH6) antibody is generated from rabbits immunized with a

KLH conjugated synthetic peptide between 61-89 amino acids from the

N-terminal region of human K Cadherin (CDH6).

Dilution WB~~1:1000 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions K Cadherin (CDH6) Antibody (N-term) is for research use only and not for use

in diagnostic or therapeutic procedures.

Protein Information

Name CDH6

Function Cadherins are calcium-dependent cell adhesion proteins. They

preferentially interact with themselves in a homophilic manner in connecting

cells; cadherins may thus contribute to the sorting of heterogeneous cell

types.

Cellular Location Cell membrane; Single-pass type I membrane protein

Tissue Location Highly expressed in brain, cerebellum, and kidney. Lung, pancreas, and

gastric mucosa show a weak expression. Also expressed in certain liver and

kidney carcinomas

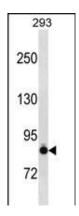

Background

CDH6 is a type II classical cadherin from the cadherin superfamily. It is a calcium dependent cell-cell adhesion membrane glycoprotein comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. Cadherins mediate cell-cell binding in a homophilic manner, contributing to the sorting of heterogeneous cell types and the maintenance of orderly structures such as epithelium. Strong transcriptional expression of the CDH6 gene has been observed in hepatocellular and renal carcinoma cell lines, suggesting a possible role in metastasis and invasion.
