

TACR3 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP14222b

Product Information

Application WB, E **Primary Accession** P29371 Other Accession NP 001050.1 Reactivity Human Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB34207 Calculated MW 52202 406-435 **Antigen Region**

Additional Information

Gene ID 6870

Other Names Neuromedin-K receptor, NKR, NK-3 receptor, NK-3R, Neurokinin B receptor,

Tachykinin receptor 3, TACR3, NK3R, TAC3R

Target/Specificity This TACR3 antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 406-435 amino acids from the

C-terminal region of human TACR3.

Dilution WB~~1:1000 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions TACR3 Antibody (C-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

Protein Information

Name TACR3

Synonyms NK3R, TAC3R

Function This is a receptor for the tachykinin neuropeptide neuromedin-K

(neurokinin B). It is associated with G proteins that activate a phosphatidylinositol-calcium second messenger system. The rank order of affinity of this receptor to tachykinins is: neuromedin-K > substance K > substance P.

Cellular Location

Cell membrane; Multi-pass membrane protein.

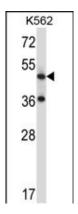

Background

This gene belongs to a family of genes that function as receptors for tachykinins. Receptor affinities are specified by variations in the 5'-end of the sequence. The receptors belonging to this family are characterized by interactions with G proteins and 7 hydrophobic transmembrane regions. This gene encodes the receptor for the tachykinin neurokinin 3, also referred to as neurokinin B.
