

# **QPRT Antibody (C-term)**

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP14383b

#### **Product Information**

**Application** WB, IHC-P, E **Primary Accession** Q15274 Other Accession NP 055113.2 Reactivity Human Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB34298 Calculated MW 30846 206-234 **Antigen Region** 

### **Additional Information**

**Gene ID** 23475

Other Names Nicotinate-nucleotide pyrophosphorylase [carboxylating], Quinolinate

phosphoribosyltransferase [decarboxylating], QAPRTase, QPRTase, QPRT

Target/Specificity This QPRT antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 206-234 amino acids from the

C-terminal region of human QPRT.

**Dilution** WB~~1:1000 IHC-P~~1:100~500 E~~Use at an assay dependent concentration.

**Format** Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions** QPRT Antibody (C-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

#### **Protein Information**

Name OPRT

**Function** Involved in the catabolism of quinolinic acid (QA).

## **Background**

This gene encodes a key enzyme in catabolism of quinolinate, an intermediate in the tryptophan-nicotinamide adenine dinucleotide pathway. Quinolinate acts as a most potent endogenous exitotoxin to neurons. Elevation of quinolinate levels in the brain has been linked to the pathogenesis of neurodegenerative disorders such as epilepsy, Alzheimer's disease, and Huntington's disease.
