Protein Information

Name	GNL1
Synonyms	HSR1

Function

Possible regulatory or functional link with the histocompatibility cluster.

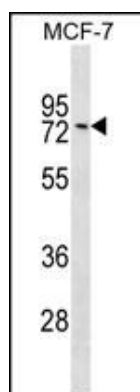

Background

The GNL1 gene, identified in the human major histocompatibility complex class I region, shows a high degree of similarity with its mouse counterpart. The GNL1 gene is located less than 2 kb centromeric to HLA-E, in the same transcriptional orientation. GNL1 is telomeric to HLA-B and HLA-C. [provided by RefSeq].
